LBO (RAVEL)

P-CSCF in the VPLMN, analyses the dialled digits, and if an emergency call is detected, may reject that call with SIP response code "380”. Emergency subservice type may be included for CS domain emergency calls

S8HR

P-CSCF in the HPLMN, based on the roaming agreement and the configured local emergency numbers for that VPLMN, analyses the dialled digits, and if an emergency call is detected, may reject that call with SIP response code "380".
This requires “per MCC” configuration in P-CSCF
