

3GPP TSG GERAN2#29

San José del Cabo, 25-27 April, 2006

Chairman's summary

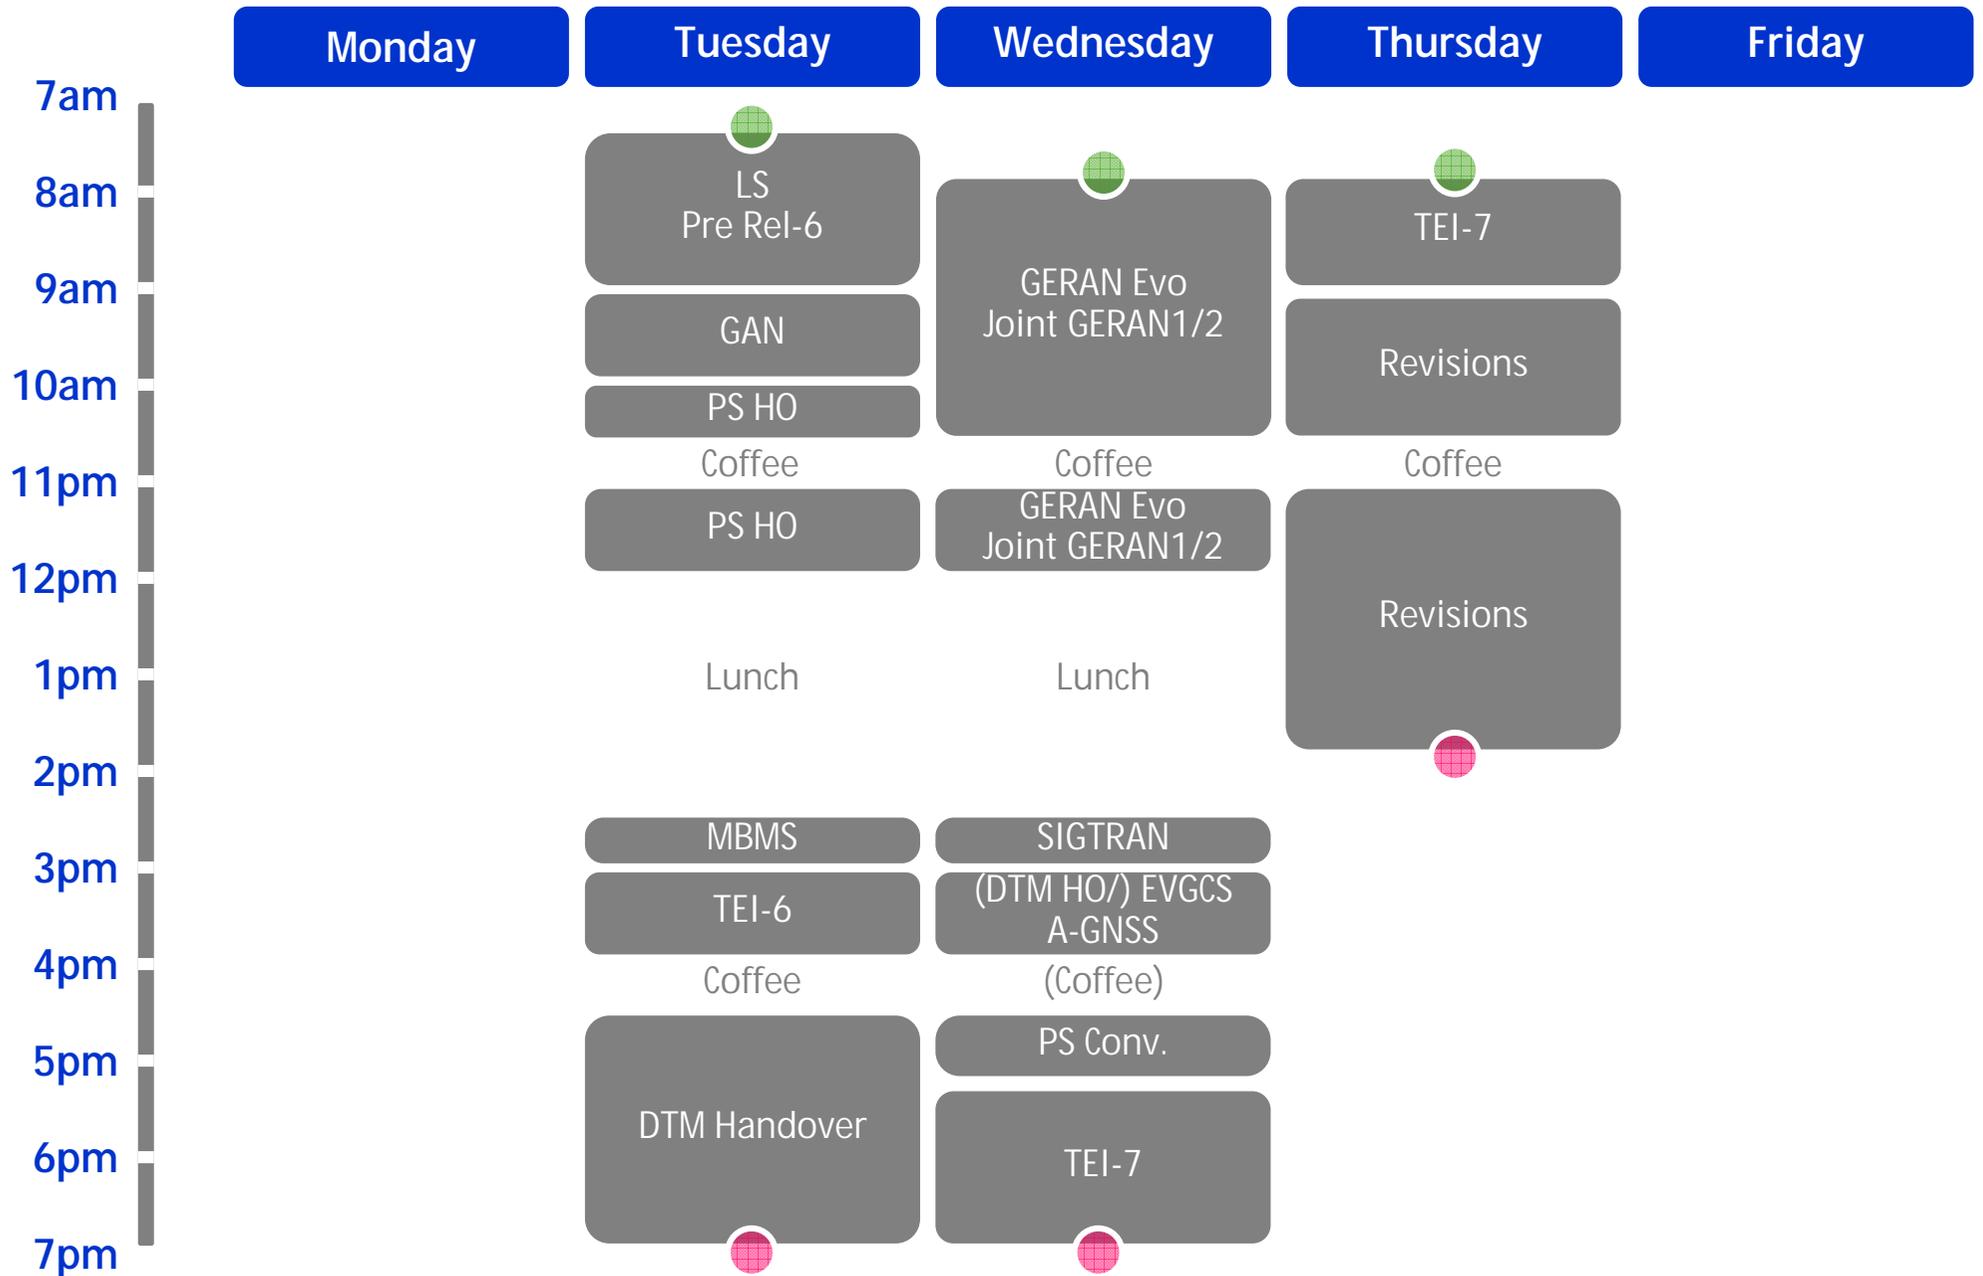

Guillaume SÉBIRE (Nokia-TP/Hki)

Incoming Contributions per Agenda Item

Total: 102

Excluding CRs agreed in G2#28bis

Pre Rel-6 Corrections (1/2)

- MS Behaviour with DTM ASSIGNMENT COMMAND (R99+)
 - One implementation irrespective of the support of MTBF (Rel-6+) or not
 - 2a: Less TBFs than ongoing
 - Resolved by mandating the network to address as many TBFs as currently assigned
 - 2c: More TBFs than ongoing
 - More efficient to allow the reconfiguration of all resources upon assignment of a new TBF, however this is an enhancement and would only be made in Rel-7 (Rel-6?)
 - Linked with DTM Enhancements in Rel-6
 - Resolved by mandating the network to address as many TBFs as currently assigned
 - 3a: handover between request / assignment
 - Any (uplink) request made in the old cell is discarded: Return DTM Assignment Failure upon reception of DTM ASSIGNMENT COMMAND including UL TBF.
To accept a DTM ASSIGNMENT COMMAND (downlink TBF) in the new cell, DTM Info / SI6 must have been received before that
- GP-060985, GP-060986, GP-060987 CRs 04.18, 44.018: Plenary
- GP-060793, GP-060843 CRs 44.018 postponed (Rel-6+)
- GP-060798, GP-060844 CRs 44.060 postponed (Rel-6+)

Pre Rel-6 Corrections (2/2)

- RAI in RIM Routing Information toward RNC (Rel-5+)
 - Replacement of Global RNC ID by RNC Identifier: allows the DNS queries for RIM proc. and SRNS relocation to be the same
 - [GP-060845](#), [GP-060846](#) CRs 48.018 agreed
 - [GP-060847](#) CRs 48.018 agreed
- HMSC and (EGPRS) PACKET CHANNEL REQUEST (Rel-5+)
 - Define the coding of the MSC bits in (EGPRS) PACKET CHANNEL REQUEST messages: only MSC 1-29 can be indicated. Indicate the MSC from which the HMSC is derived.
 - [GP-060848](#), [GP-060849](#), [GP-060850](#) CRs 44.060 agreed

Completed Rel-6 Work Items (1/3)

- MBMS
 - Clarification T3195
 - GP-060858 CR 43.246 endorsed
 - GP-060859, GP-060860 CRs 44.060 agreed
- TEI6
 - G2-050861, G2-050542 CRs 44.018 agreed: correct the order of IEs in CHANNEL RELEASE message (backwards compatibility)
 - ACCH Enhancements:
 - Repeated FACCH
 - Applicable to response frames
 - Extend the T200 timer in the MS by 40ms
 - Repeated ACCH Capability added to CM3
 - 0: does not support repeated SACCH
 - 1: supports repeated SACCH and repeated FACCH
 - GP-060864 CR 44.006 agreed
 - GP-060964, GP-060965 Draft CRs 24.008 endorsed. LS to CT1 in GP-060966

Completed Rel-6 Work Items (2/3)

- GAN
 - [GP-060852](#) CR 44.318: Clarifications to PLMN Selection
 - [GP-060853](#) CR 44.318 agreed: mandate the use of same PT in downlink and uplink RTP packets
 - [GP-060854](#) CR 44.318 agreed: Multirate Configuration Clarification: clarify how the thresholds and hysteresis apply for codec mode selection (as already outlined in stage 3)
 - [GP-060764](#) CR 44.318 agreed: Measurement quantity for UTRAN cells for handover from GAN (previously endorsed in G2#28bis: editorial changes made only)
 - Rove-in / Call re-establishment
 - [GP-060924](#) CR 43.318 Endorsed
 - Rove-in may be applied to support CS call re-establishment following the loss of an RR connection in GSM or to support packet service re-establishment following abnormal TBF release with cell reselection in GPRS
 - [GP-060982](#) CR 44.318 Agreed: define the use of the RE field to allow call-reestablishment after rove-in upon RR connection failure
 - Rove-in may be applied to support CS call re-establishment following the loss of an RR connection in GSM if call re-establishment is allowed (as indicated by the RE field)

Completed Rel-6 Work Items (3/3)

- PS HO
 - GP-060742 CR 43.129 endorsed: misc. corrections
 - GP-060855 CR 43.129 endorsed: misc. corrections
 - GP-060856, GP-060857 CR 48.018: new cause values: PS HO not allowed (dynamic), PS HO not supported (static)
 - CRRM for PS domain, PS Handover
 - Clarification of the need for this and what information is needed. What is the gain vs. existing CS CRRM info?
 - How to convey that information, should it be needed:
 - Not RIM
 - Either reuse CS signalling (+/- for and against that) or reuse PS Handover signaling and containers

Other technical work – Rel-7 – DTM Handover

- Stage 3 CRs
 - GP-060967 CR 44.018 agreed
 - GP-060968 CR 44.060 agreed
 - GP-060969 CR 48.008 agreed
 - GP-060975 CR 48.018 agreed
 - Nokia to investigate the need for DTM HO – No PS Resource cause value within PS HO Required NACK PDU
- Critical Resource Indication
 - Proposal for the TBSS not to allocate any resources if critical resources cannot be allocated, hence avoiding the SBSS to cancel allocation of resources should they have been allocated otherwise: save signalling
 - Proposal supported by a number of companies
 - No technical issues raised
 - No agreement yet
 - LS to RAN3 in GP-060983 to address the inter RAT case

Other technical work – Rel-7 – VGCS Enhancements

- GP-060974 CR 44.018 agreed: Support of AMR for VBS/VGCS
- GP-060953 CR 48.008 agreed: Correction of Cell Identifier List
- GP-060763 CR 48.008 agreed: Sending of messages to VGCS talker on dedicated channel

Other technical work – Rel-7 – GERAN Evolution

- No progress made in GERAN2 on Latency enhancements
 - Latency enhancements are needed for VoIP
 - However further evaluations needed in particular wrt. a number of competing proposals and complementing proposals
 - Potential issues with multiplexing with other users to be addressed
 - Esp. feasibility of multiplexing of other users during silent periods of VoIP users questioned
 - Evaluations needed vs. FLO and dedicated channels
 - Gains/complexity questioned for non-real time services
- DC DL
 - EGPRS only
 - Desire to re-use as much as possible existing mechanisms and concept
 - Inputs needed on DC DL and DTM

Other technical work – Rel-7 – SIGTRAN over A, Lb, Lp

- GP-060870 CR 43.059 endorsed
- GP-060951 CR 48.001 agreed

Other technical work – Rel-7

- A-GNSS
 - GP-060984 CR 43.059 to plenary: introduction of A-GNSS
- PS Conversational Services
 - Evaluation needed of non-persistent RLC mode and compliance with
 - Transfer delay
 - FER requirements
 - Latency reduction: open
 - WI Rapporteur (Ericsson) to maintain a list of open issues to guide the work

Other technical work – Rel-7 – TEI-7

- Misc.
 - [GP-060962](#) CR 48.071 agreed: Describe the coding of Enhanced Measurement Results field within Enhanced Measurement Report IE
 - [GP-060956](#) CR 44.060 agreed: power reduction (Pb) applies to both PCCCH and PBCCH blocks
 - Misc editorials:
 - [GP-060571](#) CR 44.060 agreed
 - [GP-060957](#) CR 44.018 agreed
 - [GP-060958](#) CR 44.060 agreed: Reporting cells not present in the GSM Neighbour Cell list
 - Abnormal case from the network side if the MS finds a cell not in the GSM NCell list having an allowed NCC
 - Reluctance to specify a new feature to tackle this
 - One GSM NCell list is acquired, report only cells from that list

Other technical work – Rel-7 – TEI-7

- MBMS
 - Proposal to include inband signalling indicator in MBMS notification rejected
 - MBMS Cell Re-selection enhancement
 - [GP-060977](#) CR 43.246 endorsed
 - Proposal on MS_ID Release indication in GP-060711
 - MS indicates in MBMS DOWNLINK ACK/NACK message when MS_ID is released (e.g. due to cell change, RR connection establishment)
 - Allows faster re-use of MS_ID by the network

Outgoing LSs

- GP-060977 Reply LS to GERAN3 on Clarifications on some EGPRS topics
- GP-060976 LS to CT1 on ACCH capability indicator
- GP-060961 LS to RAN3, CT4 on Adding RAI in Routing information towards an RNC
- GP-060983 LS to RAN3 Critical Resource Indication for PS and DTM Handovers

Future meetings

- GERAN2#29 25-27 April 2006 San José del Cabo, Mexico
- GERAN2 #29bis 22-24 May 2006 Sophia Antipolis, France
- GERAN2#30 27-29 June 2006 Lisbon, Portugal
- GERAN2#31 05-07 September 2006 Denver, USA
- GERAN2#31bis 16-20 October 2006 **TBD**
- GERAN2#32 14-16 November 2006 Sophia Antipolis, France
