Subject: Response to Availability of civic alerting function of 3GPP/3GPP2 terminal at roaming

Dear Jie,

TIA TR-45.8 is collaborating with ATIS on civic alerting for the 3GPP and 3GPP2 technologies. We received a copy of your LS (COM 2 – LS 134 – E) on the Availability of civic alerting function of 3GPP/3GPP2 terminal at roaming, and would like to provide some comments.

TIA and ATIS have been jointly working on the Commercial Mobile Alert System (CMAS) for the past several years. CMAS has been operating in the US for a while. We are currently working on enhancements for a Canadian Commercial Mobile Alerts Service.

TIA TR-45.8 would be happy to consider further requirements from ITU-T SG2 while we develop these new Standards..

Sincerely,

---

Betsy Covell  
Chair, TIA TR-45.8
