

3GPP TSG SA Meeting #66

SP-140831

Maui, US, 10-12 December 2014

Agenda item 5.3

REL-13 SA WG2 PRIORITIZATION

ERICSSON

MOTIVATION

- › Regulatory & Public safety Work Items need to be included in the release. 3GPP may consider scoping within Work Items, but a must have in the release content.
- › Most of the system wide features in Rel-13 relate to Mission Critical aspects and have dependencies with multiple WGs and their work.
- › Features that are small and considered “low hanging fruit” and improves 3GPP network performance (e.g. UE, network components etc.) should be included in the release package (considered value added for the community).
- › Features that enable/assist virtualization and operator revenue opportunities are considered.
- › SA2 needs to accommodate and adjust their work item scope according to RAN WIs and keep timeslots for TEI13 and RAN lead WIs that may have additional impacts in SA2 work.

ERICSSON PRIORITY (IN NO PARTICULAR ORDER)

› Main Track

- HLcom
- eDRX
- DECOR
- AESE
- eProSe_Ext
- eMBMS enhancements
- MCPTT
- IOPS (dependent on other ongoing work to make sensible conclusions, may need phasing)

ERICSSON PRIORITY (IN NO PARTICULAR ORDER)

› Parallel Track

- SETA
- eWEBRTCI
- FMSS
- NBIFOM

COMPLETED WIS (GOING TO MAINTENANCE MODE)

- › CSPS_COORD
- › DRuMS
- › voE_UTRAN_PPD
- › eUMONC
- › UPCON
