

# **Third Generation Partnership Project**

**DRAFT REPORT v2.1.3** 

3GPP TSG-CN / ETSI SMG3 Meeting #7

> Madrid, Spain 13th - 15th March 2000

Hosted by TELEFÓNICA MÓVILES

Chairman: Harald Dettner, Siemens AG. <u>Harald.dettner@icn.siemens.de</u>

Vice Chairman: Steven Hayes, Ericsson Inc. <a href="mailto:Stephen.hayes@ericsson.com">Stephen.hayes@ericsson.com</a>

Vice Chairman: Masami Yabusaki, DoCoMo Europe SA. yabusaki@docomo.fr

Secretary: David Boswarthick, ETSI MCC. david.boswarthick@etsi.fr

# 1 Opening of the Meeting

The 7th TSG\_CN Plenary meeting took place from 13<sup>th</sup> to the 15<sup>th</sup> of March in Madrid hosted by TELEFÓNICA MÓVILES.

Mr. Luis Lopez Van Damm, general manager of TELEFÓNICA Intercontinental welcomed the TSG\_CN delegates to the Madrid on behalf of TELEFÓNICA MÓVILES and explained the logistical details for the remainder of the week.

The CN Plenary was held at the same time as the Terminal and RAN Plenaries, and was directly followed on the Wednesday by the SA Plenary meeting.

The CN Chairman, Mr. Harald Dettner welcome the delegates and opened the meeting at 09:00 on Monday 13<sup>th</sup> March.

# 2 Approval of the Agenda

The meeting agenda is available on the 3GPP server at the following location: <a href="mailto:ftp://ftp.3gpp.org/TSG\_CN/TSG\_CN/TSGN\_07/Agenda/">ftp://ftp.3gpp.org/TSG\_CN/TSG\_CN/TSGN\_07/Agenda/</a>

NP-000132: Rev. Draft Meeting Agenda.

**CONTENT:** The document contains the revised Agenda, and additional allocation of Tdocs to

agenda items.

**DISCUSSION:** At the beginning of meeting the allocation of tdocs was revisited, and modifications

made for new documents, and mis-allocated documents. This is reflected in the structure of this meeting report, but the agenda document itself was not REVISED.

Also it was decided to take contentious issues out of the Work group discussions, and

deal with them globally in a separate section.

**RESULT:** The Agenda was **AGREED** 

# 3 Approval of the TSG\_CN#6 Meeting Report from Nice

The CN#6 meeting report is available on the 3GPP server at the following location:

ftp://ftp.3gpp.org/TSG\_CN/TSG\_CN/TSGN\_06/Report/

NP-000018: Revised CN#6 Meeting Report from the Nice meeting.

**CONTENT:** The document contains the Draft CN#6 meeting report. The report was completed and

distributed by the MCC at the end of the meeting. There was the usual 2-week deadline for comments by e-mail, and these comments have been integrated in this revised

meeting report v2.1.1 presented in this document.

RESULT: The meeting report was APPROVED and is placed to the FTP server as the final

report v3.0.0.

# 4 Letters / Reports from other groups and Urgent Issues

# 4.1 TSG\_CN Working Groups

NP-000029: LS from N1 on Access signaling and mobile station behavior for Multicall.

Presented by Hannu, N1 chairman.

**CONTENT**: LS from N1 to N2, and copied to N Plenary for information only

**RESULT:** The document was **NOTED** 

NP-000030: LS on Open Items identified by the CN All IP Ad Hoc. Presented by Hannu.

RESULT: The document was NOTED - FORWARDED for consideration to CN/S2 All IP

Workshop

NP-000038: LS from N1 on the status of Multicall. Presented by Naoki Tani of NTT DoCoMo.

CONTENT: CN WG1 discussed the remaining open issues identified by the Multicall Adhoc (17-18,

Feb. 2000) at its #11 meeting (28th Feb. – 3rd Mar. 2000).

CN WG1 conclude that all remaining open issues related to CN WG1 were solved.

**RESULT:** The document was **NOTED** 

# 4.2 Other 3GPP TS Groups

NP-000020: LS from S3 on MAP Security.

**CONTENT**: Contains a LS from S3 on MAP Security.

**DISCUSSION**: Note; no one was available to present the document. However it can be noted that this

LS has already been handled by N2.

Harald reminded the delegates that incoming LSs to TSG N should have

someone to present them.

**RESULT:** The document was **NOTED** 

NP-000039: LS from S3 on MAP Security.

RESULT: The document was WITHDRAWN DUPLICATE OF NP-000020

NP-000040: LS from S3 - Statement on security issues in VHE/OSA.

CONTENT: S3 would like to point out that the Home Environment provi

S3 would like to point out that the Home Environment provides services to the user in a managed way, possibly by collaborating with HE-VASPs, but this is transparent to the user. The same service could be provided by more than one HE-VASP and HE-VASP

can provide more than one service.

Additionally, but not subject to standardisation, the user may access services directly from Value Added Service Providers. The Home Environment does not manage services obtained directly from VASPs. A mechanism may be provided which allows the user to automate access to those services obtained directly from VASPs and personalise those services. However such a mechanism is outside of the scope of this specification. Here a HE-VASP denotes a Home Environment Value Added Service Provider. This is a VASP that has an agreement with the Home Environment to provide services.'

S3 has the following final comments:-

- 1. Secure UA to Application End-to-End authorization is an issue between UA and application and as such transparent for OSA.
- 2. Secure User Authorization to the Application via secure access to User Profile Data, (to verify that the User has subscription rights to specific applications) VHE/OSA allows applications to be registered and made available to users. Once the user selects an application (made available through VHE) it can be assumed by the application that the user has the right to subscribe to the application.
- 3. The transfer of a Secure User Identity (and possibly signature) to the application, to ensure that the Application can secure access to the Appropriate internal data store at the Application/Application Server. The UMTS network will authenticate a user and a secure user identity is available. Since VHE is a mechanism to provide application to user authenticated in the UMTS network, it can be assumed that the user identity used in the UMTS network can be used as a secure user identity for application as well. So it will be a simple matter of transferring this identity to the application.

**DISCUSSION**: Note: no one was available to present the document.

**RESULT:** The document was **NOTED**.

NP-000054: A mechanism for reporting authentication failures from VLR/SGSN to HLR.

**DISCUSSION**: In this document S3 informs N2 that a new mechanism for reporting authentication

failure from VLR/SGSN to HLR is being specified in TS 33.102.

The mechanism itself is quite simple and only consists of an authentication failure report from VLR or SGSN to HLR. HLR will then acknowledge the authentication failure report.

The authentication failure report will need to contain the user identity (IMSI) and a failure cause code information element. The only two codes identified so far is:

- wrong network signature

- wrong user response

This LS has already been seen by N2, and the CRs have been drafted and are presented to CN#7 for approval.

**RESULT:** The document was **NOTED**.

### 4.3 Others

NP-000019: LS from SPAN 5 SWG 1A on Transport mechanisms for the Generic Addressing

and Transport (GAT) protocol.

**CONTENT:** ETSI SPAN5 SWG1A is developing the specification of the Generic Addressing and

Transport (GAT) protocol, in parallel with similar activities of ITU-T Study Group 11

Q.11.

This document contains the "Benefits and capabilities of the GAT protocol" provides further information, as well as The latest ITU-T draft of the GAT protocol specification is also attached. ETSI SPAN 5 SWG 1A intend to approve an EN with the same technical

content soon.

The GAT protocol provides a signaling system independent layer. To use the GAT protocol in the domain of a specific signaling system, transport mechanisms of that

signaling system must be available.

SPAN 5 SWG 1A asks:- **Do you intend to develop a standard endorsing the GAT** protocol and providing transport mechanisms for the signaling system you are

responsible for? If yes, in which timeframe?

**DISCUSSION**: As no one was not available to present the document, the LS was simply noted.

**RESULT:** The document was **NOTED**.

NP-000115: LS from GMS NA on all IP issues.

**DISCUSSION**: Already seen at the CN all IP ad hoc meeting

**RESULT:** The document was **NOTED**.

NP-000121: LS from GSMA ISG activity on Typical Radio Parameter sets. Presented by

Masami, who is also the conveyor for this group

**CONTENT:** GSMA ISG has produced a "Typical Radio Parameter sets" document, which describes

the parameters preferred by operators to ensure interoperability. These parameters are chosen within the range specified in 3GPP specifications and will not give any impact on the 3GPP core specifications but it is strongly recommended that the 3GPP testing specifications will be produced assuming that operators use mainly the parameters in

the document.

**DISCUSSION**: The content of the document is destined to RAN and copied to CN only for information.

**RESULT:** The document was **NOTED**.

NP-000122: LS on Typical Radio Parameter Sets Document submission from GSM

Association - IMT-2000 Steering Group (ISG). Presented by Masami, who is also the

conveyor for this group

**DISCUSSION**: Contains additional support information for NP-000121.

**RESULT:** The document was **NOTED**.

# 5 Reports from TSG\_CN Working Groups

# 5.1 TSG\_CN WG1 (N1)

# 5.1.1 Report from N1

NP-000081: N1 Status Report. Presented by Hannu, N1 Chairman.

**CONTENT:** This report summarizes the progress of TSGN1 on the work items which have been

active in the working group since TSGN plenary meeting #6. More detailed meeting reports are available on the 3GPP server and they are also provided to this meeting in Tdoc NP-000105 (Abiko) and NP-000106 (Umeå). Additionally an estimate of R2000

work is given in section 4.4 of this document.

**DISCUSSION:** There were comments made on the TCC proposal relating to Shift lock and Line identity

that has been presented to N1. This introduces regional variations to the global 3GPP

standards.

Input for this work should be brought to 3GPP Plenaries by interested companies

or regions.

Note: CLI service enhancements have been made for the fixed network in SPAN, it is

possible that 3GPP also use this material.

(See also discussion to td's 171 & 179 for SS-ad hoc)

Harald proposes that interested parties present contributions for this work. Also there

should be an input made to the TSG\_SA plenary, indicating that this TCC work is

desired for inclusion.

**RESULT:** The document was **NOTED**.

NP-000104: Liaison Statements agreed in CN 1 since CN#6

**RESULT:** The document was **NOTED** 

NP-000105: CN1 #10 Meeting Report

**RESULT:** The document was **NOTED** 

NP-000106: CN1 #11 Meeting Report

**RESULT:** The document was **NOTED** 

NP-000084: Release 1999 Submission form for MULTICALL Presented by Hannu.

CONTENT: The document contains the Release 1999 Submission form for MULTICALL that has

been updated to reflect the progress made in this area.

DISCUSSION: TSGN1 consider that the work on MULTICALL is complete.

There has been active discussion between TSGN1 and the other groups since TSGN #6 in order to finalise the multicall work item for R99. The work in TSGN1 has been coordinated using an open item list and all of the items on the list have now been

covered either with a CR or in some cases with a reference to a decision meaning that no action is required by TSGN1.

TSGN1 provides its part of the multicall CRs for plenary approval in tdoc NP-000095.

**RESULT:** The document was **ENDORSED**.

NP-000088: Release 1999 Submission form for Multimedia. Presented by Hannu.

**CONTENT**: **TSGN1 task on the WI is complete**. All main N1 working assumptions have been

collected in Multimedia TR 23.972. An earlier version of the TR in tdoc NP-000103 was provided for the TSGN #6 for information. It has been updated since then and now TSGN1 forwards 23.972 to TSGN plenary for approval asking for it to be raised to

version 3.0 and to be frozen as part of R99.

TSGN1 provides its part of the multimedia CRs for plenary approval in tdoc NP-000096.

**DISCUSSION**: The message from this document is that for N1, Multicall for R99 is complete.

Note: N3 has not been informed whether this was a GSM and/or UMTS Work Item – However this is not contentious for N3.

CN Plenary agrees that Multimedia call is applicable for GSM AND UMTS

Following this decision, the N1 CRs can be approved.

**RESULT:** The document was **ENDORSED**.

NP-000086: Release 1999 Submission form for GSM-UMTS interworking and MM for UMTS.

Presented by Hannu, N1 Chairman.

CONTENT: Contains the W.I sheet for R99, GSM-UMTS interworking and MM for UMTS

**DISCUSSION: TSGN1 task on the WI is complete.** Also with this work item an open item list was given as the task list for TSGN1 to complete by TSGN #7 plenary. All of the issues plus one additional open item which was identified after TSGN #6 have now been covered

either by a CR or a decision meaning that no TSGN1 action is needed.

The problem with 23.009 still remains, TSGN1 is not confident to be the only reviewer of the proposed changes but would also like to ask for TSG-N2 comments before final endorsement. There is also a practical problem with the SDL diagrams which make far too large files to be handled in a practical way and also the format used by the tool causes problems. The files seem to be either unreadable (.doc) or impossible to update (.pdf). Also the meeting secretary indicated a problem with implementing the CRs due to not having the original SDL files available.

Because of the size of the files it is not feasible to ask the secretary to redraw the diagrams from paper or .pdf format.

It was noted that the original SDL source files for 23.009 cannot be found either by ERICSSON or within the archives of ETSI. The CRs are presented without the SDLs, and ERICSSON propose to produce this once the CRs are approved.

lan Park retrieved the SDLs for GSM Phase 2 from his hard disk during the meeting.

The related CRs for GSM – UMTS interworking CRs are provided for plenary approval in tdoc **NP-00092** and **NP-00093**.

**RESULT:** The document was **ENDORSED**.

NP-000082: TSGN1 Terms of Reference. Presented by Hannu.

**CONTENT**: This document describes the agreed guidelines for 3GPP TSG-N1 work. It is intended

to list the agreed meeting practices in TSG-N1 regular meetings and ad-hoc meetings that may be organised by TSG-N1. The original document was agreed in TSGN #2 in Fort Lauderdale. This should be a living document which can be updated as necessary when new procedures need to be introduced or the existing ones need to be revised.

**RESULT:** The document was **APPROVED** 

NP-000083: Release 1999 Submission form for Security. Presented by Hannu.

CONTENT: Contains the R99 Status Sheet on Security from N1.

- **⊗** Authentication failure of the network by the MS
- ⊗ Integrity protection of emergency calls
- ⊗ Encrypted IMSI
- **⊗** USIM triggered re-authentication

**DISCUSSION**: N1 recommends that Authentication failure of the network by the MS, and Integrity protection of emergency calls be retained for R99.

CN Plenary Supports that Authentication failure of the network by the MS, and Integrity protection of emergency calls be retained for R99.

N1 recommends that USIM triggered re-authentication be moved to R00.

> CN Plenary supports that USIM triggered re-authentication be moved to R00

**RESULT:** The document was **ENDORSED**.

NP-000087: Release 1999 Submission form for QoS Presented by Hannu.

**CONTENT:** Three open items were identified in TSGN #6, the length of TFT, default values for

unused code points in QoS IE and mapping between R98 and R99 QoS.

TSGN1 has agreed CRs to cover the two former issues and S2 have done the third one. So there are no more open items and TSGN1 reports its work on this WI completed for R99. TSGN1 work item status is in tdoc NP-000087.

133. TOOM WORK ICHT Status is in tuoc in 000007.

The QoS related CRs are provided for plenary approval in tdoc NP-000099.

**RESULT:** The document was **ENDORSED** 

#### 5.1.2 Questions for Advice and Decisions from N1

NP-000081: Elements requiring guidance from CN Plenary from the N1 Status Report.

CN endorse the transfer of 04.02 to 24.002

NOTE: Nokia will make a proposal on the extension of IMEI numbers, either by extending the number of bits, of coding in Hex as opposed to binary coding.

**03.01** is under N1 responsibility has no R99 equivalent and this has to be transferred to SA2. How to proceed

- CN Plenary agree to the transfer of 03.01 to SA2
- > S2 are to be informed and the specification database must reflect this change.

# 5.1.3 Approval of Contributions from N1

NP-000089: CRs on ASCI.

RESULT: All were APPROVED

NP-000090: CRs to EDGE.

**RESULT:** All CRs were **APPROVED** 

NP-000091: CRs on GPRS.

RESULT: All CRs were APPROVED

NP-000092: CRs on GSM-UMTS Interworking (Part 1).

**RESULT:** All CRs were **APPROVED** 

NP-000093: CRs on GSM-UMTS Interworking (Part 2).

**RESULT:** All CRs were **APPROVED** 

NP-000094: CRs on MS Classmark.

**DISCUSSION**: CR A987 should be changed Cat A.

**RESULT:** All CRs were **APPROVED** 

NP-000095: CRs on Multicall

**DISCUSSION**: Peter Kobringer (Ericsson) objected to the CR 002 to 23.009. This version of the CR is

a later one that the one discussed during the N1 meeting. However it has been sent to the N1 reflector. It is to this latest version that Ericsson have objections. Objections are on the subject of inter-MSC handover issues and supporting/non-supporting MSC.

Potentially impact on non-supporting MSC is imposed.

RESULT: All CR except the CR 002 to 23.009 were APPROVED

The CR to 23.009CR002 is NOT APPROVED and is referenced back to N1/N2 for

revision.

NP-000096: CR to 24.008 on Multimedia.

**CONTENT:** The document does not include all of the revision marks.

**RESULT:** The CR was **APPROVED** 

NP-000186 - CR to 24.008 on Multimedia.

**CONTENT:** includes the revision marks that provide additional clarity for the editing team to the CR

in NP-000096.

**RESULT:** The CR was **APPROVED** 

NP-000097: CRs to Work Item NITZ.

DISCUSSION: 1st CR has incorrect CAT.

RESULT: All CRs were APPROVED

NP-000098: CRs to 3G Work Item Out of Band Transcoder.

**DISCUSSION**: All CRs are for basic CODEC selection, and hence not open issues.

The CR in N1-00422 was not approved by N1 for presentation to Plenary.

RESULT: All CRs except 23.108 CR003 were APPROVED

23.108 CR003 is NOT-APPROVED and is referred back to N1 for further study.

NP-000099: CRs to 3G Work Item QoS

**RESULT:** All CRs were **APPROVED** 

NP-000100: CRs to 3G Work Item Security

DISCUSSION: 24.008 CR118 is removed from the package and presented separately (NP-000157)

The Package contains no CRs to contentious issues with regard to open issues to be

clarified by S3

RESULT: All CRs were APPROVED EXCEPT 24.008 CR 118r3

24.008 CR 118r3 is REVISED to NP-000157

**↓** Part Revised **↓** 

NP-000157: 24.008 CR118r4 on Integrity checking of MM and GMM messages. Presented by lan

Park of Vodafone Airtouch.

CONTENT: Contains the revised 24.008 CR118r4 taken out of the package of Security CRs in NP-

000100

**RESULT:** The CR was **APPROVED** 

NP-000101: CRs to 3G Work Item TEI

**RESULT:** All CRs were **APPROVED** 

NP-000103: TR on Multimedia v1.0.0

**CONTENTS:** This document contains Multimedia report TR23.972 V1.0.0, that have been agreed by

TSG\_N WG1, and is forwarded to TSG\_N Plenary meeting #7 for approval.

**DISCUSSION:** Version 1.0.0 has already been presented and this must be revised to v2.0.0

Note: When a TR/TS is intended for approval to v3.0.0, it should be presented to

TSG\_N as a version 2.x.x.

**RESULT:** The TR is **APPROVED to be upgraded to v3.0.0.** 

NP-000130: CRs for ASCI to 04.08. Presented by Ansgar Bergman.

**CONTENT**: The document contains CRs to 04.08/24.008 for ASCI. The ASCI rapporteurs have

discovered that several change requests have to be urgently approved in order to move the NOTIFICATION RESPONSE message from the MM sub-layer to the GSM RR sub-

layer.

The MM related CRs to 24.008 and 04.08 are presented to CN#7 /SMG3 for approval

DISCUSSION: Mikko mentioned the requirement of more time to study the CRs. These CRs also have

to be seen by SMG2.

lan Park suggested E-mail approval with a closing date for comments of 31<sup>st</sup> March.

Comments should be addressed to the CN exploder.

The CRs will also be sent to the N1 exploder for review.

**RESULT:** The CRs were put on **E-mail APPROVAL until 31**<sup>st</sup> March.

The CRs were subsequently approved without Comments

NP-000131: CRs for ASCI to 04.08.

**CONTENTS:** Contains a duplicate of NP-000130.

**RESULT:** The document was **WITHDRAWN**.

# 5.2 TSG\_CN WG2 (N2)

# 5.2.1 Report from N2

NP-000126: N2 Status Report to TSG\_N#7. Presented by Ian Park, N2 Chairman.

CONTENTS: This report can be regarded as an executive summary of the work of N2, N2A and N2B

since the last N plenary meeting.

**DISCUSSION:** Question on the status of EUIC. Is it mandatory or optional? Ian clarified that it is

mandatory in the visited network and optional on the home network. Yun-Chao Hu stated that this is not yet clearly defined in S3. The issue of EUIC was considered as contentious, and taken out of this section to in order to have a joint discussion with the

other CN WGs.

N2 view that MAP Security principles are stable enough to be included in R99 for completion by TSG\_N#8. However some parties express that there needs to be some

more work. No CRs are available at that point of time.

**RESULT:** The document was **NOTED** 

NP-000159: Request to Include T1P1 Number Portability Harmonization CRs in R99.. Source

VoiceStream Wireless, Aerial, BellSouth, Nokia, SBC Communications.

**CONTENTS:** The document contains a proposal that the T1P1 Number portability CRs be given an

extension for inclusion as part of Release 99

Considering that number portability capability is beginning to be deployed in the US in anticipation of the FCC regulatory requirements and that US GSM operators strongly desire that these deployments be standardized, and also considering that the CRs being proposed only affect GSM deployments in NA, the contributors are requesting that TSG-CN and TSG-SA agree that the T1P1 Number portability CRs be given an extension for inclusion as part of Release 99. The objective would be to complete this

effort in time for approval at the June TSG meetings.

DISCUSSION: It is noted that some of these issues are North American specific. Operators outside of

this region do not need to be aware of this specificity.

The CRs are quite North American specific, and could not be easily employed as a solution for anyone outside of this region. To make these CRs more global, it may be a solution to replace the references to North American with a general term.

CN agrees to including this function for R99 and CRs shall be produced within N2 for approval at TSG\_N#8

RESULT: The document was DISCUSSED and the proposal ENDORSED

NP-000031: Meeting Report N2A#9

**RESULT:** The document is **NOTED** 

NP-000032: Meeting Report N2A#2

**RESULT:** The document is **NOTED** 

NP-000080: Liaison Statements agreed in CN 2B since CN#6

**RESULT:** The document is **NOTED** 

NP-000162: Liaison Statements agreed in CN 2A since CN#6

**RESULT:** The document is **NOTED** 

#### 5.2.2 Questions for Advice and Decisions from N2

NP-000158: Camel Functions to be included in Release 2000. Presented by lan Park

CONTENTS: This contribution lists those functions of CAMEL which were shown in NP-99511 as

being for inclusion in Release 2000. TSG-CN are asked to decide whether these

functions are all appropriate for inclusion in Release 2000.

⊗ MO calls: Mid call procedure (22.078 section 5.7).

MO/MF calls: Creation of call parties - Call Party Handling (22.078 section 5.10).

⊗ MT calls: Mid Call procedure (22.078 section 6.7).

⊗ CSE Initiated call setup (22.078 section 8).

⊗ Procedures for USSD (22.078 section 11).

⊗ User Interaction scripts (section 14.4).

Enhancements to CSE control of call duration – playing of tones (22.078 section 15.4).

Enhancements to Call Forwarding interactions (22.078 sections 18.3.1, 18.3.2).

⊗ Interactions with Optimal Routeing (22.078 section 20)

**DISCUSSION:** Ian Park noted that there has not yet been any guidance from SA1 on this issue.

A related LS will be sent to S1 in NP-000136.

**RESULT:** The subject was **DISCUSSED** 

NP-000136: LS to S1 Camel Functions to be included in Release 2000.

**RESULT:** The document was **APPROVED to be sent from TSG\_N**.

# 5.2.3 Approval of Contributions from N2

NP-000110: TS 23.116 v2.1.0 Supercharger stage 2

**DISCUSSION:** Hold some text on EUIC, which is identified as a contentious issue for CN. It is

proposed to approve the version of TS 23.116 without this text (NP-000169)

**RESULT:** The TS is **NOT APPROVED** 

NP-000169: TS 23.116 v2.0.0 Supercharger stage 2

**DISCUSSION:** Version of the specification without the text on EIUC.

After completion of discussion and recommendation to move EUIC to R00 the version

2.0.0 was approved ie. the version before inserting EUIC-specific text.

RESULT: APPROVED to be upgraded to v3.0.0

NP-000108: TS 23.119 GLR Stage 2

**RESULT:** The TS is **APPROVED to be upgraded to v3.0.0** 

NP-000111: TS 23.153 Out of Band Transcoder Control Stage 2

**DISCUSSION:** This specification needs fundamental restructuring to separate R'99 and R'00 issues;

R'00 material should be moved to informative annex.

For further information see the Nortel contribution NP-000114 on this issue.

**RESULT:** The TS is rejected due to open issues. **NOT APPROVED.** 

NP-000107: TS 29.119 GTP for GLR

**RESULT:** The TS is **APPROVED to be upgraded to v3.0.0** 

NP-000109: TS 29.120 MAP for GLR

**RESULT:** The TS is **APPROVED to be upgraded to v3.0.0** 

NP-000033: CRs to Work Item Camel Ph2 (N2A)

RESULT: All CRs were APPROVED

NP-000064: CRs to Work Item Camel Ph2 (N2B)

RESULT: All CRs were APPROVED

NP-000034: CRs on TS 23.078 to Work Item Camel Ph3 - Part 1 (N2A)

RESULT: The document was REVISED to 0160

**↓** REVISED **↓** 

NP-000160: CRs on TS 23.078 to Work Item Camel Ph3 - Part 1 (N2A).

DISCUSSION: At the time of the presentation Lucent objected to N2A-000277 CR 056r3 to 23.078, on

GPRS TCAP dialogues, and requested more time to study its content, and possibly propose an alternative solution. This was postponed to contentious items in NP-000188. Steffen stated that this CR is seen as urgent for implementation in R99, and should be postponed only if Lucent will propose an alternative or revised solution.

RESULT: All CRs except 23.078 CR 056r3 to were APPROVED

Note (CR 23.078-056r3 was APPROVED later the meeting); see TCAP/GPRS issue RE-PRESENTED in NP-000188.

NP-000035: CRs on TS 23.078 to Work Item Camel Ph3 - Part 2 (N2A).

**RESULT:** All CRs were **APPROVED** 

NP-000036: CRs on TS 23.078 to Work Item Camel Ph3 - Part 3 (N2A).

**RESULT:** All CRs were **APPROVED** 

NP-000065: CRs to Work Item Camel Ph3 (N2B).

**DISCUSSION:** User Interaction is a contentious issue. There is an outstanding issue in SA.

RESULT: All CRs except 23.018 CR 028r1 were APPROVED

23.018 CR 028r1 was RE-PRESENTED in 0183 (and later rejected).

NP-000161: CRs on TS 29.078 to Work Item Camel Ph3 (N2A).

DISCUSSION: User Interaction is a contentious issue. There is an outstanding issue in SA. Handling of

TC dialogues for CAMEL control of GPRS is a contentious issue; there was an objection

from Lucent (see also the discussion on NP-000160)

RESULT: All CRs except 29.078 CR 018 and CR 058 were APPROVED

The two CRs 29.078 CR 018 (TCAP dialogues) and 29.078 CR 058 (User Interaction)

were NOT APPROVED and RE-PRESENTED in NP-000188. and NP-000183

respectively.

NP-000055: CRs to Work Item Call Forwarding Enhancements (N2A)

**RESULT:** All CRs were **APPROVED** 

NP-000066: CR to Work Item Call Forwarding Enhancements (N2B)

**RESULT:** The CR was **APPROVED.** An open issue has been identified on Long forwarded to

numbers (GMSC not being able to deal with a Long forwarded to number sent in a Resume Call Handling for ORLCF). Additional CRs to provide the solution will be made

in this area.

NP-000063: CRs to Work Item ASCI Ph.2

**RESULT:** All CRs were **APPROVED** 

NP-000067: CRs to Work Item GPRS

NP-000076: CRs to Work Item Security

**RESULT:** The document was **REVISED to 0133** 

**↓** REVISED **↓** 

NP-000133: CRs to Work Item Security

**DISCUSSION:** Some contentious issues on Security, (IMSI encryption, EUIC). The contentious CRs were removed and re-presented in a separate document.

Some problems were noted with the 5 CRs to 03.03/23.003 on enhanced IMEI security. This text was previously discussed at SMG#30, and it was mentioned that 03.03 is not the specification that should hold this information. It would be simpler to have a reference to 02.16, where this text should be held.

The CRs to the contentious issues were identified and re-presented for further discussion in 2 manageable documents.

The non contentious CRs were approved in this document:-

23.012 CR 004 APPROVED

29.002 CR 089 APPROVED

29.002 CR 099 APPROVED

29.002 CR 103r1 APPROVED

29.002 CR 104 APPROVED

29.002 CR 102r2 APPROVED

29.002 CR 110 APPROVED

22.018 CR 049 APPROVED

23.012 CR 005 APPROVED

29.060 CR 080r2 POSTPONED until TSG\_N#8. (S3 have to make a corresponding

CR to 33.102).

RESULT: The CRs on EUIC were moved to NP-000138. The CRs to GSM 03.03 and TS 23.003

on enhanced security for the IMEI were revised to NP-000174 to NP-000179. (the

EUIC CRs were later rejected and the IMEI CRs were later approved.)

NP-000137: Summary of the status of Security CRs (except those on EUIC), formerly

presented in NP-000133. Presented by lan Park.

**CONTENT:** For those delegates who were as confused as the secretary by the extraction and

revision of CRs into other documents, this table outlines the status of the CRs contained

within NP-000133

NP-000178: CR to 03.03 R98 Modification of section 6.2 to enhance IMEI security

**RESULT:** The CR was **APPROVED** 

NP-000144: CR for the Removal of UI in the monitoring state. Presented by Sumio Miyagawa of

Siemens.

**CONTENT:** Following the decision that user interaction is not a part of R99, this CR was presented

directly to CN Plenary.

**DISCUSSION:** S1 will need to align the stage 1; this will be done at a later stage.

RESULT: CR 23.078-117 was APPROVED

# 5.3 TSG\_CN WG3 (N3)

# 5.3.1 Report from N3

NP-000041: Status Report from N3 to N#7. Presented by Norbert Klehn, CN3 Chairman.

**CONTENTS:** This report summarizes the progress of TSGN3 on the work items which have been

active in the working group since TSGN plenary meeting #6.

**DISCUSSION:** Clarification on Bearer modification without pre-notification. S1 has sent detailed

requirements, and N3 are awaiting a W.I description sheet from S1or contributions from

any interested companies.

**RESULT:** The document was **NOTED**.

NP-000042: Draft Report from N3#8 Meeting Sophia.

**RESULT:** The document was **NOTED**.

NP-000043: All LSs sent from N3 since TSG#6

**RESULT:** The document was **NOTED**.

### 5.3.2 Questions for Advice and Decisions from N3

# [Extract from NP-000041]:

A further version of the draft specification for real-time non-transparent Fax (23.146) was presented by NTT DoCoMo. Due to the late provision of this document other companies were not able to check the specification in detail. Main concerns raised up related to the following topics:

Architecture on terminal side is not as expected Application of T.38 is not complete

Text is not clear and many areas require clarifications.

It was not possible to approve this specification during the meeting. So, it was decided to get a approval after the meeting per e-mail. For this, an updated version was provided by NTT DoCoMo where first comments from the meeting were incorporated. However, there are still concerns with the approval of this specification. Therefore this specification is presented in NP-000052 as version 1.1.0, but not as 2.0.0. in order to show what was reached until now but not requesting an approval for getting a version 3.0.0. **CN#7** is asked to give guidance how this work item can be finalised (in R99 or R00).

Masami raised a related question on the content of R99 on the implications of moving work to R00.

**Harald replied**:- R99 should hold all of the element that have compatibility implications, and also essential features, and also those elements that are mature enough to be completed.

**Masami** said that NTT DoCoMo are eager to resolve the NT Fax open issues, and asked the N3 chairman to provide a work plan for this.

Norbert encouraged the use of E-mail discussion and asked NTT DoCoMo to progress work. However NTT DoCoMo are in the driving seat and are responsible for the work on NT Fax.

**Note:** Alcatel believed that this work will not be complete by CN#8, and asked that this work be postponed to R00.

Peter Kobriger (Ericsson):- There are many open points that have not been resolved since 6 months, and there is a lot of work that must be completed for the inclusion of this work in R99, and CN3 has a lot of work to complete over the coming months. Ericsson supports the postponement to R00

Norbert noted that there are 3 solutions for facsimile in UMTS.

T37 IP based

T38 IP based

RT NT Facsimile

It has been agreed to align the RT NT solution and the T.38 solution. This work must be included in 23.146. There is an open issue on this within N3.

**Mikko** voiced his concerns that delaying R99 issues until June will delay the overall implementation of R99.

Masami stated that NTT DoCoMo do not disagree with RT NT Facsimile being moved from R99 to R00, as long as work can be completed as quickly as possible. The technical Freezing of the R00 work item puts additional pressure to have the work complete as soon as possible.

CN Agree to move RT NT Facsimile to R00, with goal to be technically frozen in TSG#8 N3 is urged to work hard in this issue.

NP-000128: Discussion Paper; Current state of 23.146. From Ericsson

**DISCUSSION:** Noted and forwarded to N3 as a basis as for further technical study.

**RESULT:** The document was **NOTED**.

# 5.3.3 Approval of Contributions from N3

NP-000044: CRs to Work Item CS Bearer Services

**RESULT:** All CRs were **APPROVED** 

NP-000045: CR to Work Item FTM

**RESULT:** The CRs was **APPROVED** 

NP-000046: CRs to Work Item Multimedia

**RESULT:** All CRs were **APPROVED**

**RESULT:** All CRs were **APPROVED** 

NP-000051: Work Item Description Sheet for CS Multimedia for R00

**CONTENTS:** This document includes the fallback feature that could not be complete for R99.

**RESULT:** The document was **APPROVED** 

NP-000052: TR 23.146 v1.1.0

**RESULT:** The document was **NOTED** and remains as **V1.1.0** 

NP-000053: TR 23.910 v2.0.0

**RESULT:** The document was **APPROVED to be upgraded to v3.0.0.** 

### 5.4 TSG\_CN WG SS Ad Hoc (NSS)

### 5.4.1 Report from NSS

NP-000163: Status Report from NSS to TSG\_N#7. Presented by Steffen Habermann, SS ad hoc

interim chairman.

**CONTENTS:** The TSG CN SS ad hoc meeting took place from 17 – 18 February 2000 in Sophia

Antipolis hosted by ETSI. This contribution gives a summary report of the achievements

of the SS ad hoc. Details can be found in the MCC report in Tdoc NP-000021.

**DISCUSSION:** It should be noted that:

Due to the lack of a new chairman and the lack of new work items (besides Multicall), it is proposed that TSG CN looks for a new home for the supplementary service activities in Release 2000. The major task will be the maintenance of the existing specifications in

this new environment.

**RESULT:** The document was **NOTED** 

NP-000021: Report from NSS Meeting#5 in Sophia.

**RESULT:** The document was **NOTED** 

#### 5.4.2 Questions for Advice and Decisions from NSS

No input for this agenda item.

# 5.4.3 Approval of Contributions from NSS

NP-000022: TS 23.135 v1.1.0 Stage 2 spec for Multicall.

**RESULT:** The document was **APPROVED to be upgraded to v3.0.0.** 

NP-000023: TS 24.135 v1.0.0 Stage 3 spec for Multicall.

**RESULT:** The document was **APPROVED to be upgraded to v3.0.0.** 

NP-000028: CR to Work Item MSP Ph. 2

**RESULT:** All CRs were **APPROVED** 

NP-000119: CR to 24.080 Work Item Multicall. Presented by Tani of NTT

CONTENT: Contains a CR to 24.080 that has not been seen by NSS and is presented to the

TSG\_N meeting directly. The CR is for the introduction of Multicall.

**RESULT:** The CR was **APPROVED** 

NP-000171: Global cause of no ID. Source Nokia.

**RESULT:** The document was not presented and may be **NOTED** 

NP-000189: Technical Implementation on Cause of no ID. Source NTT DoCoMo

**RESULT:** The document was not presented and may be **NOTED** 

# 5.5 TSG\_CN VHE / OSA Ad Hoc Activity

NP-000058: Status Report from OSA

**CONTENT:** The document contains the STATUS REPORT, for OSA R'99

**DISCUSSION: Q:** Why has is been decided that the OSA API mapping part would be informative?

R: The behavior of the API has been standardised not the API mapping. Stage 2

specification states that this is an interface not for standardisation.

**RESULT:** The document was **NOTED** 

NP-0000172: Status of OSA work item. Presented by Mikko of Nokia.

CONTENT: The document contains an analysis of the work carried out on OSA.

The conclusion of the document reads: Recent OSA meetings have made significant progress in a very short time but nevertheless, lack of time has lead to the exclusion of essential capabilities and definitions from OSA. Moreover, in some areas the definitions have been left too vague for a reliable multivendor implementation. If such a specification is included in the 3GPP Release, it leads to incompatible proprietary implementations among the early adopters of the OSA specification. This would fragment the OSA market. Consequently, adding the missing functionalities and definitions in later Releases would become a tedious and time consuming exercise when manufacturers would be protecting their own implementations.

OSA has failed to meet the expectations for the specification quality and completeness, and the agreed deadline. There is still a fair amount of work to be done, de-stabilising Release 99 late into year 2000.

To guarantee a reliable and multivendor capable OSA in 3GPP specifications, it is suggested that OSA as a whole be postponed to Release 2000.

**RESULT:** The document was **NOTED** 

NP-000180: VHE/OSA Release 99. Contribution from Siemens Ericsson and Lucent Presented by

Lucas.

**CONTENT:** Contains a proposal by the source companies that strongly recommends that the

current set of VHE/OSA specifications will be endorsed by TSG#07 for inclusion into VHE/OSA R'99. It can also be noted that VHE/OSA R'99 has a strong industry support.

**DISCUSSION:** Concern with Multi-vendor interoperability. Network state resulting from a particular

application may vary depending on implementation.

Requirement for standardisation of API semantics as opposed to this being

'informative'.

After an informative show of hand on the inclusion of OSA in R99 or R00 the following

decision was taken by TSG\_N.

CN agree to the inclusion of OSA in R99 but target for completion is TSG\_N#8 on

the outstanding issues

**RESULT:** The proposal within the document was **ENDORSED** 

NP-000056: 3G TR 29.998 1.0.0 Open Services Architecture - API - Part 1.

**RESULT:** The document was **NOTED** 

NP-000057: 3G TR 29.998 1.0.0 Open Services Architecture - API - Part 2.

**RESULT:** The document was **NOTED** 

NP-000181: VHE/OSA Stage 2 and Stage 3 activities for R'00. Contribution from Siemens

Ericsson and Lucent Presented by Lucas.

**CONTENTS:** The document contains a proposal for release 2000 to merge the description of

Framework and Network Service Capability Features from TS 23.127 into TS 29.198 and to create a single and generic stage 3 specification to standardize the Open Service

Architecture API's.. This would lead to a much more effective means for the

specification work. Stage 2 should then focus its content on the architectural work to

provide concepts to reflect the VHE requirements.

DISCUSSION: The document could be restudied at the joint meeting between S2/CN to discussion. A

LS will be sent to S2 outlining these issues. The LS can be found in NP-000193.

CN notes the document, and expects a decision on this to be made at TSG\_N#8.

**RESULT:** The document was **NOTED** 

NP-000193: LS to S2 on the organisation of the work on VHE/OSA Release 2000

**RESULT:** The document was **APPROVED to be sent** 

NP-000182: Background information on OSA Release '99.

CONTENTS: This contribution aims to provide delegates with some background on this interface, and

shows that the interface under discussion is largely the same as an interface already worked out in the OSA Ad-hoc output document (3G TS 29.1xx version 0.3.0 part 1).

RESULT: The document was NOTED and forwarded to OSA Ad Hoc for information.

### 5.5 TSG\_CN ITU-T Co-ordination Activity

NOTE for information the CN ITU-T Ad Hoc Mail exploder has the following address: 3GPP\_TSG\_CN\_AH\_ITUT

NP-000116: ITU-TQ.1701 Supplement. Presented by Masami.

**CONTENTS:** Complimentary documentation to the IMT 200 family.

This Supplement is an "information" document and is intended as a roadmap and a source of references for documents related to IMT-2000 specifications from ITU-T as well as from sources outside the ITU (e.g., 3GPPs and SDOs.) The list of documents contained in this Supplement should therefore be treated as "bibliographic" references. The scope includes any relevant standards that are targeted toward the specification of

IMT-2000 systems.

**RESULT:** The document was **NOTED** 

NP-000168: Standardization/Specification of NNI (Network-to-Network Interface)

standardization with Other IMT-2000 Family Member Systems. Presented by

Masami, the author of the document.

**CONTENTS:** This document discusses an issue of NNI with other IMT-2000 Family Member Systems

and clarifies some necessary preliminary steps within 3GPP and actions to outside organizations (i.e., ITU-T and 3GPP2) to start the detailed NNI specification /

standardization work.

The author proposes propose to start the preliminary steps for NNI Specification /

Standardization in the relevant WGs (TSG-SA1, SA2, TSG-CN2).

**DISCUSSION:** Questions were raised on the implications of interacting directly with 3GPP2.

Issue if global roaming was raised, which is achieved by multi-mode terminals supporting the different access technologies. Hence a joint NNI between family member systems solution will be required for this.

**Albert:** The decision on which NNI should be used is considered both premature and beyond the scope of 3GPP.

The choice is allow ITU-T to produce the new NNI, or standardize it within 3GPP.

3GPP should have a study on the interfamily NNI to determine a policy. This type of coordination should be done within S2.

CN supports the proposals 1 and 2

- (1) NNI with other IMT-2000 Family Member Systems needed? (by S1). As mentioned below, S1 has already started some service requirement works. However, S1 should reconsider whether the market is demanding the NNI between GSM evolved CN and other IMT-2000 family CN.
- (2) What functions should be provided in the NNI? (by S2). ITU-T SG11 has already identified that NNI should at least provide mobility management, service control, call/bearer control. Any further functions?

Is was agreed that the LS should be revised to a LS to SA and S1, asking them to consider the requirement for study of this work. As Masami had to travel during the meeting, the LS was not seen by the CN plenary, and was presented to the SA plenary in document *SP-000137*.

**RESULT:** The document was **NOTED**.

NP-000185: Cooperation with ITU-T SG11. Presented by Masami

**CONTENT:** This document proposes the necessary work in 3GPP TSG-CN with regards to cooperation with ITU-T SG11.

ITU-T SG11 is currently undertaking an informal meeting with 3GPPs as shown in Annex. 3GPP TSG-CN is expected to express its position with regard to cooperation with ITU-T.

In TSG-CN, ITU-T coordination ad hoc was established to work as a bridge between 3GPP and ITU-T and to deal with high level political issue. So far, it has been assumed that the work could be proceeded by e-mail basis. This time, 3GPP TSG-CN should submit a written paper to the proposed informal meeting. Therefore, I'm currently planning to hold a face-to-face meeting tentatively as follows.

Date: 29<sup>th</sup> – 30<sup>th</sup>, May, Place: DoCoMo Europe Office in Paris.

- (1) Expectation to ITU-T SG11 (e.g., NNI, Synchronization of Workplan)
- (2) Liaison method between 3GPP and ITU-T SG11
- (3) Drafting the position paper

The result of the meeting will be presented in TSG-CN #8. The draft position paper will be approved also.

**DISCUSSION:** Henry Taylor: SG11 has a 4 year work cycle, and the present period ends in November of this year. It would be useful to address the SG11 expectations of this new study period.

PCG should also be made aware of this meeting, as well as a copy of the invitation being made available to TSG\_SA.. This presented to the SA plenary in document *SP-000138*.

Masami will revise the invitation and agenda of the meeting, and these will be sent to the CN ITU-T Ad Hoc exploder.

CN Plenary encourage the meeting

**RESULT:** The document was **NOTED** 

# 5.7 TSG\_CN R00 All IP Activity

NP-000015: Meeting Report from CN R00 Ad Hoc Meeting in Mexico. Presented by Stephen

Hayes.

**RESULT:** The document was **APPROVED**.

NP-000141: Summary of CN R00 Ad Hoc Meeting in Mexico. Presented by Stephen Hayes.

**DISCUSSION:** Confirmation of the CN/S2 Helsinki meeting dates:

Joint S2/N1 11<sup>th</sup> – 13<sup>th</sup> April

- Joint S2 / CN 13<sup>th</sup> – 14<sup>th</sup> April.

Note: This date clashes with the planned N3 meeting – an arrangement will be found.

**RESULT:** The document was **NOTED**.

NP-000010: Open Item List generated from the CN R00 Ad Hoc Meeting in Mexico. Presented

by Stephen Hayes.

**RESULT:** The document was **NOTED**.

# 5.8 Review of TSG\_CN Work Program

NP-000146: Revision of SP-99639. Presented by Harald

**CONTENT:** SP-99639 was produced during the TSG\_SA#6 meeting. It contains the status of R99

work items across the TSGs and SA Working groups.

**DISCUSSION:** The document was revised on-line during the TSG\_N#6 meeting and the results are

given in this document.

RESULT: The document was DISCUSSED

### 5.8.1 Work Items / Work Tasks in TSG CN and SWGs

NP-000170: LCS in Release 99. Presented by Mikko Kanerva of Nokia

**CONTENT:** The document is from 3GPP S2 coordinator on location services in UMTS, and

contains cover sheet for submitting TS 23.171 Location services in UMTS stage 2 specification to TSG-SA#7 for approval in Release 99, and a supporting SA2 document

on location services in Release 99.

It is noted that some open issues belong to the TSG-CN area, as listed in the Release

99 submission form:

Minor CRs to 23.007, 23.008 and 23.016 to point out that some paragraphs are

applicable to GSM only

GSM 04.30 is to be transferred to 3GPP, as 24.030, to cover LCS for GSM and UMTS in R99

TSG-CN is asked to recognise the need for completing this work item in R99.

**DISCUSSION:** There is sympathy to study this as an element to be included in R99, to be revisited at TSG#8.

CN Plenary allow N1 and N4 a study period to produce material for TSG N#8.

RESULT: The proposal contained within the document was AGREED.

NP-000173: Proposed Enhanced IMEI Coding Format. Presented by Mikko Kanerva of Nokia.

**CONTENT:** The document contains the following proposal:-

Given the strong reliance on the interoperability with legacy products no change to IMEI length or structure is considered feasible. In contrast, the coding format of the Serial Number is proposed to be modified. The new coding format is proposed to be included in 3GPP Release 99 specifications.

Instead using BCD, a hexadecimal coding format is proposed. It would offer a capacity of 16.7 million units manufactured with one Type Approval Code.

TAC would set a trigger for interpretation (Network would identify from which TAC number onwards a serial number would be interpreted as binary presentation), or

Alternatively, a date could be set before which terminals should use the old IMEI coding format

Contains Draft CRs to GSM 22.016, 23.003, 24.008 and 25.33

DISCUSSION: Iain: suggests that rushing this may result in a 3 digit MNC

CN has sympathy that this is studied in N1.N4 and also R4 must be made aware.

RESULT: The document was NOTED to be forwarded to the relevant groups

NP-000145: N3 Work Item Summary Sheets for R99. Source Norbert N3 Chairman.

**RESULT:** The document was not seen and may be **NOTED**.

NP-000156: Attachment to "R99 WI-Sheet for GSM – UMTS Interworking". Source N1.

**RESULT:** The document was not seen and may be **NOTED**.

# 5.8.2 Release 1999 and Release 2000

NP-000123: Release 99 finalisation. Source NTT DoCoMo.

RESULT: The document was not seen and may be NOTED.

NP-000124: Completion of Release 99. Source BT.

**RESULT:** The document was not seen and may be **NOTED**.

NP-000125: CN Structure & Objectives for Release 2000. Source BT.

**RESULT:** The document was not seen and may be **NOTED**.

### 5.9 Letters to Other Groups

No input to this agenda item.

### 5.10 Contentious Issues / Open Items

Note: In order to accelerate the presentation of the Work Group material, it was decided to take all contentious issues and discuss them separately. These Issues are presented below.

# 5.10.1 Enhanced User Identity Confidentiality

#### Status from N2

Most of the work is complete within N2, and the CRs are presented to this plenary for approval.

GSM VLR Re-start is the only open issue on this. N2 are awaiting guidance from S1 and S3 on this.

NP-000138: CRs from N2 to W.I Enhanced User Identity Confidentiality Presented by Ian Park

**CONTENT**: This document contains "6" CRs on Work Item Security (Enhanced User Identity

Confidentiality), that have been agreed by TSG\_N WG2, and are forwarded to TSG\_N

Plenary meeting #7 for approval.

DISCUSSION: GSM VLR Re-start is the only open issue for EUIC. N2 are awaiting guidance from S1

on this.

**Note:** There are related CRs yet to be produced by N1, and it is proposed that these 6 N2 CRs be postponed until the complete package of CRs to this work item is ready, and

the decisions from SA have been made available to TSG\_N.

**RESULT:** The CRs were **POSTPONED** 

#### Status from N1

Encrypted IMSI (EUIC) is not complete as there are outstanding issues awaiting guidance from S1 and S3.

Related CRs were presented and discussed within N1, and they could not be approved before TSG\_N#7. There were a number of open issues, and questions to these other groups that must be resolved before work on this is complete within N1.

**Steffen:** Some of the N1 open issues have already been considered by T\_Mobil who are advancing the work in this area.

Once guidance has been received from S1/S3 it would be possible to complete this work within N1 by TSG\_N#8.

#### Summary:

The deadline for completion of EUIC was for this meeting. However a number of identified open issues requiring guidance from S1 and S3 have meant that work cannot be completed.

CN do not recommend to SA whether EUIC should remain in R99 or be moved to R00.

#### > The final decision on Security has to be taken by SA.

CN is prepared to continue work on Enhanced User Identity Confidentiality once the open issues pending answers from S1 and S3 are resolved.

### 5.10.2 Map Security

NP-000127: Status of work items handled in TSG-N2 (Including MAP security). Presented by

Ian Park

**CONTENT**: The document contains all work item status sheets for N2, including MAP security.

The document identifies a number of outstanding issues for MAP security, and it is

proposed to extend MAP security work until June for R99.

**DISCUSSION**: Iain Sharp of Nortel: Consequences of delaying this work item until June would result

in delaying the implementation of such an essential feature for R99.

lan Park: Can the system survive without a security system until the end of the year,

which would be a result of moving this work item to R00?

Several Operators see security as an essential item for R99.

Several Manufacturers believe that this can be moved to R00

Steffen mentioned that MAP security is presently optional for R99. Also this topic

requires discussion with S3 and also S5.

**RESULT:** The status was **NOTED** 

**Summary:** The work can be completed quickly by N2, however CN Plenary cannot take a decision

on whether this should be included in R99/R00, and the decision will be left to SA.

### 5.10.3 Out of band Transcoder

NP-000085: Work Item Sheet for Out-of-Band Transcoder Control Presented by Hannu.

**CONTENT**: TSGN1 could not complete the work on Out-of-Band Transcoder Control in the scope

defined for the WI. Several liaisons were exchanged and parallel ad-hoc sessions were held in order to get together the minimum building blocks for R99. This was achieved by defining AMR to be the default codec for UMTS, meaning that it does not need to be signalled out-of-band during the call establishment phase. The existing BC IE structure

is kept for GSM and its contents are still useful for UMTS to GSM handover.

Adding new codecs and the signaling mechanism to negotiate the activation of the codecs should be studied for R00. TSGN1 has not had the time to draft a proposal for

the remaining R00 work.

With the above reservations, TSGN1 reports its work on the R99 part of the WI

complete and provides the CRs for plenary approval in tdoc NP-000098.

Working assumption for R99: As there is only one CODEC (AMR), this does not need to

be signalled.

**RESULT:** The document was **NOTED** 

NP-000114: Out of Band Transcoder Control Stage 2, Clarification of Release'99 Functionality.

Presented by Iain Sharp, of Nortel Networks.

**CONTENT**: It is recommended that the Out of Band Transcoder Control Stage 2 is restructured,

moving the capabilities that are to be standardised in Release'00 into a separate Annex. This Annex needs to state clearly that the capabilities within are subject to change

following the completion of work in TSG-CN1 and TSG-RAN3.

**DISCUSSION**: Relates to TS 23.153 Out of Band Transcoder Control Stage 2 (NP-000111)

> CN Agree to the removal of R00 capabilities to an ANNEX of 23.153

N2 and interested parties are requested to identify the elements to be moved to R00 in the ANNEX of TS 23.153.

RESULT: The document was DISCUSSED and the principles ENDORSED

NP-000111: TS 23.153 Out of Band Transcoder Control Stage 2

RESULT: NOT APPROVED and is sent back to N2 to reflect the R99 / R00 split.

NP-000127: W.I Status report for N2 including Out of band transcoder control from N2.

**CONTENTS:** Contains the Work Item description sheets for N2 including Out of band transcoder

control.

**DISCUSSION:** Identifies a number of open issues including:-

**⊗** Handling of Conference Calls;

- Handling of Multi Party Supplementary Services;
- **⊗** Handling of Handover UMTS to GSM;
- **Solution** 8 Mandling of Sending a tone or Announcement;
- ⊗ Protocol between MSCs (i.e. lu UP Framing versus I.366).

**RESULT:** The document is **NOTED** 

#### Summary:

The Work Item for CN Out of band Transcoder Control is not fully complete. There are a number of outstanding issues that cannot be complete within R99.

CN proposes to move these items to R00

#### 5.10.4 CAMEL Ph 3 User Interaction

NP-000187 Proposal on User Interaction in Monitoring. Presented by Sumio of Siemens.

**CONTENT:** Siemens does not oppose the feature of User Interaction in the monitoring state;

however, this feature would most preferably be in line with CPH, which is foreseen to be in release 2000. If the current CRs were accepted, the alignment work for release 2000 would be unavoidable. Therefore Siemens strongly proposes the following items:

⊗ No User Interaction in the monitoring state in release 99

STSG\_CN inform TSG\_SA of the decision so that this item may be completed uniformly with CPH.

#### **DISCUSSION:**

 CN recommend that user interaction is linked to CPH and hence should be moved to R00 (with CPH)

**RESULT:** The document was **DISCUSSED** and the proposal was **AGREED**.

NP-000183 CRs to 3G Work Item CAMEL Phase 3 related to User Interaction during

Monitoring State. Presented by Steffen.

**CONTENT:** This document contains 3 CRs on User Interaction during Monitoring for CAMEL Ph.3.

These CRs were extracted from documents (CR 028r1 to 23.018) in 0065 and 0161.

**DISCUSSION:** Following the decision to move this work item to R00, the CRs were REJECTED.

**RESULT:** ALL 3 CRs were **NOT APPROVED** 

NP-000188 CRs for TCAP dialogue management for CAMEL control of GPRS (extracted from

160 and 161).

**CONTENT:** This document contains "2" CRs on Work Item CAMEL phase 3, for TCAP dialogue

management for CAMEL control of GPRS.

**DISCUSSION:** Lucent still object to these CRs, as they do not consider this the most efficient system.

One alternative would be long TCAP dialogues.

**Lucas Klostermann (Ericsson)** – Cross phase compatibility issues if we do not introduce a solution for R99. Ericsson do not support the long standing TCAP dialogues. Siemens, Nortel, Nokia and Alcatel agreed with this position.

Nortel Nokia and Alcatel support the CRs

CN Agreed to approve the CRs and hence the solution for R99.

**RESULT:** The CRs were **AGREED** 

# 6 Technical Co-ordination with Others

# 6.1 Other 3GPP TS\_Groups

NP-000117: Draft Report of the All-IP Workshop, version 0.0.2.

**RESULT:** The document was not presented and may be **NOTED**.

NP-000118: SA ALL IP Slides.

**RESULT:** The document was not presented and may be **NOTED**.

NP-000142: LS on Joint Meeting S3 / CN on Security. Source Harald.

CONTENTS: Contains an LS to S3 copied SA and S2 proposing a joint meeting to clarify

security requirements for Release 2000.

TSG CN working groups were unable to complete the ambitious work on the security features – here especially addressing EUIC and MAP-security. The main reason for that is the late start of the work in CN. It is not worth analysing the history but we all should learn from this and derive consequences for the future.

Hence it proposed to have a joint meeting between TSG\_CN working groups and S3 on the Security requirements for R'00. Such meeting is proposed to take place before TSG#8 (May or 1st half June).

Main goal of this meeting shall be to have an early involvement of CN working groups in the development of the security features for R'00.

**RESULT:** The document was **APPROVED to be sent.** 

### 6.2 Other bodies (e.g. SMG)

No input to this agenda item.

# 6.3 ITU

No input to this agenda item.

# 7 Project Management

# 7.1 Work Item Management

No input to this agenda item.

# 7.2 Specifications within the TSG\_CN Domain

NP-000120: Specifications with the CN Domain. Presented by David Boswarthick

**CONTENTS:** Contains an extraction from the specifications database showing those TSs and TRs

under the domain of CN and it's working groups.

RESULT: The document was NOT PRESENTED and MAY BE READ OFF-LINE

# 7.3 Working Methods and Work Style

NP-000129: Usage of SDLs in technical specifications. Source Ericsson.

**CONTENTS:** Ericsson proposes to mandate the use of SDLs as normative parts in new stage 2 and

stage 3 specifications describing interworking with different nodes and requiring conditional and specific handling of a node. We see that as the only way to produce standards which ensures a proper interworking between vendors and a consistent handling, because of the reasons stated above. Textual description should be used to describe assumptions and workarounds. Ericsson proposes that CN request to the CN-WGs that SDLs shall be normative. If there are normative textual descriptions and SDL descriptions, which are in contradiction to each other, the SDL description shall be regarded as valid. However, existing specifications should not be changed, if the SDL

description is already marked as informal.

**RESULT:** The document was not presented and delegates are asked to **READ OFF\_LINE** 

NP-000140: Creation of R00 Specifications. Source MCC

**CONTENTS:** Now that the 3GPP specifications for Release 1999 are nearing completion, it is timely

to consider the mechanism for moving to Release 2000. MCC proposes a detailed

procedure for the creation and maintenance of next-release specifications.

**RESULT:** The document was not presented and delegates are asked to **READ OFF LINE** 

NP-000191: Proposed definitions of "Feature", "Building Block" and "Work Task". Presented

by Alain Sultan, S2 Secretary.

CONTENTS: Contains the definitions of terms "Feature", "Building Block" and "Work Task"

**DISCUSSION:** Clarification on Level of granularity of a Building block.

Alain clarified that "Feature", "Building Block" and "Work Task", can all be considered

as Work Items.

**Hannu:** How do we initiate new work items / are there new templates?

Alain: The procedure will be the same as now, except the template has been modified

to allow the indication or type (feature / Building block / task).

**Sumio:** How will the maintenance of specifications fit into this model.

Alain: This could be considered as a general Work Item TEI.

Clarification one Building Block can support multiple features.

**RESULT:** The document was **NOTED** 

NP-000192: Examples of Features, Building Blocks and Work Tasks. Presented by Alain Sultan,

S2 Secretary.

**CONTENTS:** The document gives a powerpoint presentation of examples of Features, Building

Blocks and Work Tasks, as well as time plans for Features.

**RESULT:** The document was **NOTED** 

NP-000190: Proposal for the Release 2000 IGCs, Features, Building Blocks and Work Tasks

v.0.7. Presented by Alain Sultan, S2 Secretary.

**CONTENTS:** This document is an initial attempt to describe the work items of R00 in terms of their function as feature, building blocks and work task. The features and building blocks has

not yet presented to nor discussed with other WG's.

The definition of features, building blocks and work tasks is described in SP-000109.

A full description of the term work item can be found in the 3GPP Working Procedures (http://www.3gpp.org/About 3GPP/3gpp wp.zip).

Introduces the idea of a person within S2 who is responsible for individual features.

The TSGs are asked to comment on the proposal, and comments are required well before the closing deadline

**DISCUSSION:** Clarification from JMM: Once the proposal is accepted and stable, ETSI will develop a database tool, that will be made available at TSG#8.

> Henry Taylor: What elements will be reused from R99 to be mapped to R00 and beyond?

Alain: The elements for R00 will be based upon R99, with additional features for that new release. Similar for future releases, R01 will be based upon R00.

TSG\_N delegates are invited to provide comments to the S2 via email before April

Stephen - There is a CN/S2 meeting planned 13<sup>th</sup> April, that will allow CN to finalise their position with regards to this information.

**RESULT:** The document was **NOTED** 

NP-000164: Proposed reorganisation of CN working groups. Presented by Harald

Contains a proposal for approval on the reorganisation of the CN working groups to CONTENTS:

cope with the existing work, and also the R00 additional work.

### Proposed New TSG\_CN structure after CN#7

WG	TOPIC	Chair-Person	
N1	MM/CC/SM	Hannu Hietalahti	Chair
N2	MAP/GTP/BCH/SS (SS – only maintenance expected)	Yun-Chao Hu	Conveyor
N3	Interworking (with external Networks)	Norbert Klehn	Chair
N4	CAMEL	Keijo Palviainen, Nokia proposed	Conveyor
N5	OSA	Lucas Klostermann, Ericsson proposed	Conveyor
N-itu	ITU-T coordination electronic workstyle??!!	Masami Yabusaki (lan Park)	Chair
N-IP	ad-hoc!! IP / IP-pre-analysis for other CN WG's Interface to S2 and others		Conveyor!!  - Group Lifetime??

**DISCUSSION:** It is expected that as the content of R00 and more specifically ALL IP, is defined by S2, the proposed CN structure may not be appropriate, and will need to be revisited.

The introduction of the All IP ad Hoc, should not delay the work until after April, and it was suggested that the existing CN WGs start work on R00 as soon as possible.

Proposed to broaden the scope of N2, to encompass core network signaling and stage 2 specification work. This will be reflected in the in the revised Terms of reference.

Proposed not to create the N-IP Ad Hoc, but the work should continue with joint meetings until TSG#.

**Henry Taylor of BT** offered to host a meeting for CN delegates in May in order to analyze the output of the April S2/CN meeting before TSG#8. This will maintain momentum on the All IIP work, and allow clear proposals to TSG\_N in June.

It was agreed that the old N2 would convene in a plenary on May 22 before being dissolved and breaking into the new structure.

**Sumio:** Mentioned that the naming of N2/N4 as proposed causes problems with the various servers This was accepted and the naming of the N2 and N4 groups was exchanged.

# With all of these comments the new structure of CN Working Groups after TSG#7 is as follows:-

WG	TOPIC	Chair-/ Conveyor	MCC Support
N1	MM/CC/SM	Hannu Hietalahti (Chair)	Ban Al Bakri
N2	CAMEL	Keijo Palviainen (Proposed Conveyor)	Monica Hellman
N3	Interworking (with external networks) (with external Networks)	Norbert Klehn (Chair)	David Boswarthick
N4	MAP/GTP / BCH/SS (SS - only maintenance expected)	Yun-Chao Hu (Proposed Conveyor)	Franco Settimo
N5	OSA	Lucas, Klostermann (Proposed Conveyor)	Monica Hellman
N-itu	ITU-T coordination electronic workstyle??!!	Masami Yabusaki (lan Park)	none

#### Note Ban Al Bakri will support the All IP joint meetings.

The convenors/chairs of these new groups are invited to draft new terms of reference to be presented to TSG#8.

**RESULT:** The document was **DISCUSSED** and the revised proposal was **AGREED**.

# 7.4 Support Arrangements

The details of MCC support for the new groups are given above.

#### 7.5 Other Issues

No input to this agenda item.

# 8 Election of TSG\_CN Officials

# 8.1 Election of TSG\_CN chairman (Monday 12:30).

Due to the departure of Harald Dettner from the position of chairman of TSG\_N, the elections for candidates for his successor were carried out during TSG\_N#7.

The vote had been announced several weeks previously by email, and the procedure for the election is presented in **NP-00017**.

Also the support material for the three candidates was provided in NP-000102, 134, and 135.

NP-000017: Procedure for the Election of CN Chair, and Vice Chairman.

**RESULT:** The document was **NOTED** 

Before beginning the vote, Harald explained an issue relating to the election of the new Chairman. A discussion has been under way on the PCG exploder, regarding the duration of the term for the new CN chairman. It is possible that the new CN Chairman's term of office continues:-

- until the end of the current term (March 2001)

or

- for a full 2 years

This situation is not yet clarified by the PCG although clarification on this is expected by PCG before TSG#11.

Harald asked the TSG\_N delegates if it is acceptable to continue under these conditions

There were no objections and the vote continued.

# **Candidates presented for CN Chairman:**

Candidate	Company	Org	Status at Election
Stephen HAYES	Ericsson	T1	Only Candidate Remaining at the time of the election
Mikko KANERVA	Nokia	ETSI	Withdrew Candidate week before election
Ian PARK	Vodafone AirTouch	ETSI	Withdrew Candidate just before election

The status of the candidates the time of the election for CN chairman is given in the above table. It can be seen that considering the content of Article 22 of the 3GPP Working Procedures, the two candidates from ETSI Organizational partners stood down before the election.

> Stephen Hayes was voted as the new TSG N Chairman by acclamation.

# 8.2 Election of TSG\_CN Vice chair (Tuesday approx 15:30)

Due to the vacancy created by Stephen Hayes being elected for Chairman, a subsequent Vice chairman election was held on the Tuesday of the TSG\_N#7 meeting. There were two candidates for the position of CN Vice chairman, both from ETSI member companies. The results after the 1<sup>st</sup> round is given in the table below:-

### **Election for CN Vice Chairman:**

Candidate	Company	Org	Status at Election
Mikko KANERVA	Nokia	ETSI	12 Votes 32%
lan PARK	Vodafone AirTouch	ETSI	26 Votes 68%

Although no single candidate obtained the 71% required to win the 1<sup>st</sup> ballot, Mikko Kanerva graciously stood down.

> Ian Park was voted as the new TSG\_N Vice Chairman .

# 9 Postponed Issues

NP-000119: CR against 24.080 on introduction of Multicall

**CONTENT:** Contains a CR to 24.080 that has not been seen by NSS and is presented to the

TSG\_N meeting directly. The CR is for the introduction of Multicall.

**RESULT:** The CRs were **APPROVED** 

NP-000167: ASCI CRs

**CONTENT:** Request to allow electronic approval until 31<sup>st</sup> March, and these will be distributed to the

N1 exploder for review.

**RESULT:** The CRs were put on **E-mail APPROVAL until 31**st March.

The CRs were subsequently approved without Comments

# 10 Work plan and Future Meetings

The following table gives the meeting dates for future TSG\_N Meetings

TSG and Location	Dates (for TSG_N)	Dates (for TSG_SA)	Comments
S2/CN R00 Helsinki	13 <sup>th</sup> – 14 <sup>th</sup> April 2000		
TSG_N#8 Dusseldorf	21 <sup>st</sup> – 23 <sup>rd</sup> June 2000	26 <sup>th</sup> – 28 <sup>th</sup> June 2000	Dates Changed
TSG_N#9 Hawaii	20 <sup>th</sup> – 22 <sup>nd</sup> September 2000		Dates Changed
TSG_N#10 Bangkok	6 <sup>th</sup> – 8 <sup>th</sup> December 2000	11 <sup>th</sup> – 13 <sup>th</sup> December 2000	
TSG_N#11 (USA)?	14 <sup>th</sup> – 16 <sup>th</sup> March 2001	19 <sup>th</sup> – 21 <sup>st</sup> March 2001	Possible Host
TSG_N#12	13 <sup>th</sup> – 15 <sup>th</sup> June 2001	18 <sup>th</sup> – 20 <sup>th</sup> June 2001	No Host
TSG_N#13	26 <sup>th</sup> –28 <sup>th</sup> September 2001	1 <sup>st</sup> 3 <sup>rd</sup> September 2001	No Host
TSG_N#14	12 <sup>th</sup> – 14 <sup>th</sup> December 2001	17 <sup>th</sup> –19 <sup>th</sup> December 2001	Ho Host

# 11 Any Other Business

No input to this agenda item.

## 12 Close of Meeting

At the closing of the meeting Harald thanked the delegates for their hard work throughout the year, and also all of the meeting hosts and support staff. Harald especially thanked Telefonica for the excellent hosting facilities that were provided for this Plenary meeting.

As this was his last meeting as TSG\_N chairman, Harald also thanked the people who have helped and advised him throughout his time in the job, In particular Michel Mouly, Peter van der Arend, and Fred Hillebrand.

As a small gesture of thanks for all that Harald has done for GSM/UMTS standardisation, and the industry in general, Masami presented him with a gift on the behalf of the CN delegates.

The 7<sup>th</sup> CN Plenary Meeting closed at 12:40 on Wednesday 15<sup>th</sup> March 2000.

## **ANNEX A: OUTPUT MATERIAL**

### A.1 Liaison Statements

The following Liaison Statements will be sent from the TSG\_CN Meeting:

DOC NP-00	Subject	То	Сс	Attachment	Sent
0136	CAMEL functions to be included in Release 2000	S1		N	20/03/00
0142	Proposal for Join meeting CN/S3	<b>S</b> 3	SA and , S2	N	15/03/00
0193	Organisation of the work on VHE/OSA Release 2000	SA, S2	CN OSA Ad-hoc	N	15/03/00
SP-000137	Standardization/Specification of NNI (Network to Network Interface)	SA		N	15/03/00
SP-000138	Meeting on Cooperation with ITU Meeting on Cooperation with ITU T SG11	SA		Ν	15/03/00

Note the two SP-000 documents were not seen by TSG\_CN and were input directly to TSG\_SA by Masami

### A.2 Work Items

The following New/Revised Work Items were approved by TSG\_CN:

DOC NP-00	Subject	Release	1 <sup>st</sup> Respo.	2 <sup>nd</sup> Respo.	Delivery
0051	Revised W.I for Multimedia	R00	N3		R00

## A.3 New Specifications / Technical Reports

The following specifications / technical report were approved by TSG\_CN. Their status after the meeting is indicated in this table:

DOC	Type	Number	Subject	Version*	WG
NP-00				@ TSG#7	
0103	TR	23.972	Multimedia	3.0.0	N1
0169	TS	23.116	Supercharger Stage 2	3.0.0	N2

## **ANNEX B: Participants List for CN#7**

Name	e-mail	Represented Organisation	Status
Mr. Jaime Abad	abad_j@tsm.es	TELEFONICA de España S.A.	3GPPMEMBER - ETSI
Miss Ban Al -Bakri	ban.albakri@etsi.fr	ETSI	3GPPORG_REP - ETSI
Mr. Andrew Allen	caa019@email.mot.com	Motorola Inc.	3GPPMEMBER - T1
Mr. Niels Peter Skov Andersen	npa001@email.mot.com	MOTOROLA A/S	3GPPMEMBER - ETSI
Mr. Yasuhiro Aso	y.aso@fujitsu.co.uk	FUJITSU Europe Telecom R & D C	3GPPMEMBER - ETSI
Mrs. Sophie Aveline	sophie.aveline@cnet.francetelecom.fr	France Telecom	3GPPMEMBER - ETSI
VIr. Ansgar Bergmann	ansgar.bergmann@etsi.fr	ETSI	3GPPORG_REP - ETSI
Mr. Ermanno Berruto	ermanno.berruto@cselt.it	TELECOM ITALIA S.p.A.	3GPPMEMBER - ETSI
Mr. Nigel. H Berry	nhberry@lucent.com	Lucent Technologies	3GPPMEMBER - T1
Mr. Olavi Blomberg	olavi.blomberg@sonera.com	SONERA Corporation	3GPPMEMBER - ETSI
Vr. David Boswarthick	david.boswarthick@etsi.fr	ETSI	3GPPORG_REP - ETSI
Mr. Paolo Capomasi	pcapomasii@wind.it	WIND TELECOMUNICAZIONI SPA	3GPPMEMBER - ETSI
Mr. Colin Chandler	colinc@qualcomm.com	QUALCOMM EUROPE S.A.R.L.	3GPPMEMBER - ETSI
Иг. Hui Chang	hichang@kt.co.kr	KOREA TELECOM CORP.	3GPPMEMBER - TTA
Mr. Jozef Dankers	jozef.dankers@siemens.atea.be	SIEMENS ATEA NV	3GPPMEMBER - ETSI
Mr. Harald Dettner	harald.dettner@icn.siemens.de	SIEMENS AG	3GPPMEMBER - ETSI
Mr. Ian Doig	IANDOIG1@email.mot.com	MOTOROLA S.A.	3GPPMEMBER - ETSI
Mr. John B Fenn	johnbfenn@aol.com	SAMSUNG Electronics	3GPPMEMBER - ETSI
Mr. François Grassot	•	BOUYGUES Telecom	3GPPMEMBER - ETSI
*	frg@rigeItelecom.com		
Mr. Cesar Gutierrez Miguelez	cesarg@tid.es	TELEFONICA de España S.A.	3GPPMEMBER - ETSI
Mr. Steffen Habermann	steffen.habermann@t-mobil.de	Deutsche Telekom MobilNet	3GPPMEMBER - ETSI
Mr. Bryan Hay	bryan.hay@one2one.co.uk	One 2 One Personal Comm. Ltd	3GPPMEMBER - ETSI
Mr. Stephen Hayes	stephen.hayes@ericsson.com	Ericsson Inc.	3GPPMEMBER - T1
Mr. Graham Heaton	grahamh@brandcomms.com	Brand Communications Ltd	3GPPMEMBER - ETSI
Ms. Monica Hellman	monica.hellman@etsi.fr	ETSI	3GPPORG_REP - ETSI
Mr. Hannu Hietalahti	hannu.hietalahti@nokia.com	NOKIA Corporation	3GPPMEMBER - ETSI
Mr. Tomas Holmström	tomas.holmstrom@ecs.ericsson.se	ERICSSON L.M.	3GPPMEMBER - ETSI
/Ir. Yun Chao Hu	yun-chao.hu@era.ericsson.se	ERICSSON L.M.	3GPPMEMBER - ETSI
Mrs. YuHong Huang	mcbtech@public3.bta.net.cn	China Mobile Company Corp.	3GPPMEMBER - CWTS
Mr. Gary Jones	gjones@omnipoint-corp.com	Omnipoint Corporation	3GPPMEMBER - T1
Mr. Luis Jordan de Urries	ljus@tid.es	TELEFONICA de España S.A.	3GPPMEMBER - ETSI
Mr. Seppo Junninen	seppo.junninen@hpy.fi	Finnet Group	3GPPMEMBER - ETSI
Mr. Mikko Kanerva	mikko.kanerva@nokia.com	NOKIA Corporation	3GPPMEMBER - ETSI
/Ir. Ku Hwa Kang	kings@sktelecom.com	SK TELECOM	3GPPMEMBER - TTA
Mr. Norbert Klehn	norbert.klehn@icn.siemens.de	SIEMENS AG	3GPPMEMBER - ETSI
Mr. Lucas Klostermann	lucas.klostermann@etm.111.se	ERICSSON L.M.	3GPPMEMBER - ETSI
/Ir. Peter Kobriger	eedpek@eed.ericsson.se	ERICSSON L.M.	3GPPMEMBER - ETSI
Mr. Takashi Koshimizu	koshimi@nw.yrp.nttdocomo.co.jp	NTT DoCoMo	3GPPMEMBER - TTC
Mr. Patrick Lohat	patrick.lohat@alcatel.fr	ALCATEL France	3GPPMEMBER - ETSI
Mr. Xuejun Lu	luxj@public.bta.net.cn	RITT	3GPPMEMBER - CWTS
Лr. Edgar Lycksell	Edgar.A.Lycksell@telia.se	TELIA AB	3GPPMEMBER - ETSI
Mr. Fernando Martinez Vega	fvega@tid.es	TELEFONICA de España S.A.	3GPPMEMBER - ETSI
Mr. Stephen McKenna	mckenna@cig.mot.com	Motorola Inc.	3GPPMEMBER - T1
Mr. Sumio Miyagawa	miyagawa@twics.com	Siemens K.K.	3GPPMEMBER - TTC
Ms. Antonella Napolitano	antonella.napolitano@cselt.it	TELECOM ITALIA S.p.A.	3GPPMEMBER - ETSI
·	·	Fujitsu Limited	3GPPMEMBER - TTC
Mr. Akishige Noda Mr. Shengyi Pan	noda@ss.ts.fujistsu.co.jp	,

# ANNEX F: SMG3 Plenary Meeting #7 15<sup>th</sup> March 2000

## F.1 Outcome of TSG\_N#7 Meeting 15<sup>th</sup> March 2000

Although No physical meeting of SMG3 Plenary took place in Madrid, the following global lines can be noted.

- > SMG3 accepts and endorses all of the CRs presented to TSG\_CN#7 and has no additional material.
- > SMG3 accepts and endorses all of the WIs and Reports presented by CN#7 and has no additional material.

#### Annex G: Access to 3GPP documents

This document briefly outlines some of the more important locations of information that all TSG\_CN members should be aware of.

### 3GPP email lists:

To receive information about CN3 issues, all delegates and other interested parties <u>MUST</u> register for email list **3GPP\_TSG\_CN**. This can be done by sending an email to <u>LISTSERV@LIST.3GPP.ORG</u> with the following single line of text in the body of the message:

subscribe 3GPP\_TSG\_CN YourFirstName YourLastName

There are many other 3GPP email lists that may also be of interest. Go to <a href="http://www.3gpp.org/e-mail.htm">http://www.3gpp.org/e-mail.htm</a> for further information.

If at any time you would like to confirm which lists you are currently a member of, just sent a message to <a href="mailto:LISTSERV@LIST.3GPP.ORG">LISTSERV@LIST.3GPP.ORG</a> with the following single line of text in the body of the message:

QUERY \*

#### **Email archives:**

All 3GPP lists have an associated <u>archive of every email sent</u> via that list. Information on how to access the archive is sent to you when you subscribe to the list. This means that if you have temporary email problems, or have just joined the group, you can check to see if you have missed any messages. The easiest was to search the archive is first to request a list of all messages sent to the particular group you are interested in. For example, to get a list of messages sent via the **3GPP\_TSG\_CN** list between 1<sup>st</sup> Jan 1999 and the current date, send the following command to LISTSERV@LIST.3GPP.ORG:

search \* in 3GPP\_TSG\_CN since Jan 1999

As well as a list of emails sent, you receive instructions about how to retrieve the emails. Some 3GPP archives are also available via a new user-friendly WWW interface. For CN, go to: <a href="http://list.3gpp.org/archives/3gpp\_tsg\_cn.html">http://list.3gpp.org/archives/3gpp\_tsg\_cn.html</a>

### Meeting calendar:

The central location for all information relating to the 3GPP meeting calendar and the corresponding meeting invitations can be found at: <a href="http://www.3gpp.org/Meetings.htm">http://www.3gpp.org/Meetings.htm</a>

### Documents on the server:

All documents submitted to CN Plenary meetings will be made available on the 3GPP document server in a directory (related to the number of the meeting) under: <a href="ftp://ftp.3gpp.org/TSG\_CN/TSG\_CN/TSG\_CN/TSG">ftp://ftp.3gpp.org/TSG\_CN/T

# History

	Document History								
Up to 15 <sup>th</sup> March 2000	DRAFT v.1.0.x provided to a select group of delegates up to the end of the CN plenary meeting.								
21 <sup>st</sup> March 2000	DRAFT v.2.0.0 dispatched to the TSG_CN mail exploder for comments.								
	ftp://ftp.3gpp.org/TSG_CN/TSG_CN/TSGN_07/Report/								
	Comments to be addressed to:								
	Mr. David Boswarthick, 3GPP TSG-CN3 Secretary MCC - ETSI Secretariat Tel :+33 (0)4 92 94 42 78								
	e-mail: david.boswarthick@ETSI.fr								
	A deadline of 2 weeks was given to the CN delegates for e-mail comments on the draft report.								
	E-mail comments back to author by 4 <sup>th</sup> April 2000								
4 <sup>th</sup> April 2000	Draft report (with revision marks) v2.1.1 placed on the FTP server								
6 <sup>th</sup> June 2000	Draft report v2.1.3 (not placed on the FTP server - updated CR list only								
21 <sup>st</sup> June 2000	Final v2.1.3 to be presented for approval at TSG#8 Meeting in Düsseldorf
