Work Item CF Enhancements (Agenda 6.12.4)

One CR addresses a functional change that needs to be endorsed by the CN Plenary. The remaining CRs are corrective CRs. The total set of CRs is in Tdoc *NP-000291*.

The functional CR addresses the interworking with networks that do not support the long-forwarded –to-number. This addresses specifically the GSM-UMTS interworking. This additional requirement needs to be endorsed by TSG SA as well.
