

**3GPP TSG\_CN**  
**Plenary Meeting #9, Oahu, Hawaii**  
**20<sup>th</sup> – 22<sup>nd</sup> September 2000.**

**Tdoc NP-000421**

**Source:** NTT DoCoMo, Inc.  
**Title:** Candidate vice-chairman, TSG-CN, Hiroshi Nakamura  
**Agenda item:** 9  
**Document for:** Decision

---

**Hiroshi Nakamura** was born in Tokyo, Japan, in 1962. He received the B.S. and M.S. degrees in electrical engineering from Waseda University in 1985 and 1987 respectively. He joined Nippon Telegraph and Telephone Corporation (NTT) in 1987. He was engaged in research of signaling system for digital cellular system (PDC: Personal Digital Cellular system) during 1987-1988 and development of switch software for PDC system during 1989-1991. Then he was engaged in development of mobile service control point (M-SCP) system during 1992-1994. Since then, he has been engaged in the development and standardization of third generation mobile network, including network architecture, ATM AAL2 transport system, packet domain system, and so on. He is bounded to be the president of DoCoMo Europe S.A. in Paris which is a base of NTT DoCoMo for the third generation mobile system standardization and the forth generation system investigation.

Regarding the standardization, he is an authority of network signaling for both PDC and IMT-2000. He was engaged in the PDC system standardization including whole network architecture in TTC during 1990-1995. He was also engaged in the standardization of ATM AAL type 2 in the ATM Forum as well as ITU-T SG13 during 1994-1996. Since then he has been engaged in IMT-2000 standardization in TTC as well as 3GPP TSG SA and CN for network architecture and signaling systems. In particular, he achieved a consensus on the standardization of ATM based packet domain network architecture for IMT-2000 at the beginning of 3GPP. He was a chairman of IMT-2000 air interface Working Group of TTC where CC, SM, MM, RRC and RLC have been standardized during 1997 – 2000.

Attachment – Support letter from NTT DoCoMo

5 September, 2000

Mr. Stephen Hayes  
Chairman  
Core Network TSG

Dear Mr. Hayes,

This is to nominate **Mr. Hiroshi Nakamura** for a Vice-Chairman of the TSG CN.

Mr. Nakamura has been attending CN-related groups such as TSG-SA, CN plenaries, SA2 to express NTTDoCoMo's position. He has been making a big effort to solve several issues, e.g., integrated CN with ATM, TrFO control in 3GPP. He has been contributing to ATM AAL type 2 protocol in ATM forum and ITU-T, also. Within NTTDoCoMo, he has been responsible to coordinate entire 3GPP standardization strategy. He is very familiar with IP technology and lead IP network experiment in NTTDoCoMo. He is now a president of DoCoMo Europe in Paris whose responsibility is further 3G standardization and 4G investigation. He will vigorously act in Europe to perform these missions.

Currently, the most important CN matter is All IP-NW. We are quite confident that TSG-CN will make a great achievement under his vice-chairmanship with our company's comprehensive support. Of course, he is supported unanimously by the TTC.

He has been working for me for more than one decade in the development of 2G and 3G systems in NTTDoCoMo. Unfortunately, I had to resign from vice-chairman of TSG-CN. However, I strongly believe that Mr. Nakamura can succeed to my spirit and endeavor to make excellent further 3G CN specifications.

Best Regards,

Dr. Masami Yabusaki  
Executive Research Engineer  
Network Laboratories  
NTT DoCoMo, Inc.
