2 Linked work items

Related work items are:

1. Architecture for Call control and roaming to support IP-based multimedia services in UMTS. S2
2. Real Time QoS for packet services including VoIP. S2, N1, RAN3 etc.
3. Emergency call enhancements - IP&PS based Emergency call enhancements. N1 etc
4. Roaming support within and between IP Multi-media network and CS Domain networks.S2, N4 etc
5. Lawful interception architecture. S3 etc

3 Justification

The work item “An architecture for Call control and roaming to support IP-based multimedia services in UMTS” describes the ongoing work in 3GPP for Rel. 5, which has been initially tasked by SA to S2 under the “all-IP option” by SA#4 (6/99). Impacts on SIP to transport QoS parameters on an intra-PLMN, as well as end-to-end.

The work item describes the ongoing work in 3GPP CN1 for Rel. 5.

4 Objective

The objective of this work item is to specify the Call Control protocol for the IM CN Subsystem for control of multimedia services based on the current Session Initiated Protocol, IETF RFC2543 (SIP) and the Session Description Protocol, IETF RFC 2327 (SDP) with required enhancements for 3GPP requirements to facilitate a multi-vendor, multi-system environment.

Stage 2 call flow descriptions and stage 3 protocol descriptions will be developed for signalling over the Gm, Mw, Mm and Mg reference points based upon the SIP Call Control Protocol and SDP. Deviations from IETF SIP should only be applied when deemed absolutely necessary. 3GPP specific SIP extensions should kept to an absolute minimum in order to allow the usage of as generic SIP protocol stacks as possible~~3GPP SIP extensions should only be provided when deemed absolutely necessary.~~

As per normal working procedure any changes which affect the high level architecture will be co-ordinated with S2.

5 Service Aspects

New services which are to be provided by this network subsystem are currently defined by a separate work item in S1. The architectural aspects are being defined in S2.

6 MMI-Aspects

yes, as new, IP-based based call control protocol will be used in the terminal

7 Charging Aspects

yes, but no impact on CN1

8 Security Aspects

yes, security mechanisms for IP-based multimedia shall be addressed by S3 with CN1 providing the specific protocol work as necessary.

9 Impacts

Affects:	USIM	ME	RAN	CN	Others
Yes		x		x	
No			X		
Don't know	X				

10 Expected Output and Time scale (to be updated at each plenary)

Meeting	Date	Activity
CN1#11	May 22-26, 2000	Rapporteur appointed for CN1 group.
