Work Item Description

Title:

~~PS-based Emergency Call Enhancements for IP& PS Based Calls – stage 3 in Rel-5~~

1 3GPP Work Area

	Radio Access
X	Core Network
X	Services

2 Linked work items

-

(1652) Emergency Call Enhancements

(2527) Emergency calls without UICC/SIM in networks with IMS

3 Justification

It shall be possible to establish an emergency call via the PS domain. Emergency calls will be routed to the emergency services in accordance with national regulations. This may be based upon one or more default numbers stored in the ME and/or USIM. It shall be allowed to establish a PS emergency call without the need to dial a dedicated number to avoid the mis-connection in roaming case, such as menu, or a linkage to a car air bag control. This functionality shall be supported by the UE without a SIM/USIM being present. No other type than Emergency calls shall be accepted without a SIM/USIM.

4 Objective

The objective of this WI is to study the functionalities required on the protocol level to meet the requirements as defined in TS 22.101, 23.060, 23.228 and other relevant specifications for emergency call handling in the PS domain.

5 Service Aspects

As defined in TS 22.101 and other relevant specifications to include but not limited to:
The main focus is on:

- Support for SIP emergency calls and related packet bearers

Points to be considered, too:

- Using the existing emergency numbering schemes
- Compliant with FCC mandates, European and other regulatory requirements
- Possibility to initiate emergency calls to different emergency call centers, depending on the type of emergency
- The function shall be supported, when roaming

6 MMI-Aspects

As defined in TS 22.101 and other relevant specifications, it shall be possible to implement different MMIs to invoke emergency services. This can be for example the dialled number, a dedicated Menu, one or more dedicated buttons, etc.

7 Charging Aspects

None.

In accordance to 22.101, no impacts on charging are foreseen.

8 Security Aspects

~~To be determined~~None.

~~In accordance to 33.102, no impacts on security are foreseen.~~

9 Impacts

Affects:	USIM	ME	AN	CN	Others
