

# 3GPP Work Plan – Cover page

Version 2004, March 11<sup>th</sup>

## Introduction

This cover sheet contains 3 parts:  
 Part 1: Specific comments for this version  
 Part 2: General recurrent information  
 Part 3: History

The last version of the Work Plan and all the related documents (cover page, PDF views, etc) are available at:  
[ftp://ftp.3gpp.org/information/work\\_plan](ftp://ftp.3gpp.org/information/work_plan)

For comments on a specific line, contact the MCC support for the WG or TSG responsible of the given task (to know who at MCC is responsible of a given WG or TSG, look at: [http://www.3gpp.org/About\\_3GPP/structure.htm](http://www.3gpp.org/About_3GPP/structure.htm) ).  
 For comment on a Feature, contact the feature’s responsible MCC support.  
 For general comments, contact the Work Plan manager at: [alain.sultan@etsi.fr](mailto:alain.sultan@etsi.fr), mentioning in the e-mail subject “General comment on the Work Plan”.

## Specific comments for this version

### *Main changes between version 16 January and 11 March 2004*

Inputs have been received from the following WGs:  
 SA1, SA2, SA4, SA5, CN1, CN2, CN4, T2, T3, GERAN

More than 300 lines have been updated since previous version (see « last modif » field) !

The following tasks containing “DELETE” in their title have been deleted:

ID	Unique_	Name	Release	Resou	Modifi	Acro	Level o	Start	Qtr 1, 2000			Qtr 3, 2000			
									Jan	Mar	May	Jul	Jul	Jul	
80	32021	<b>IMS Phase 2</b>	Rel-6	S1	No	IMS2	TSG	Mon 03/01/00							
108	13011	TO BE DELETED_Mm interface (CSCF to external IP multimedia network) -- NO	Rel-6	N1	Yes			Mon 03/01/00							
121	1365	<b>Support of Push Services</b>	Rel-6	S1	No	PUSH	TSG	Wed 03/01/01							
123	32000	<b>DELETE - MOVE TO REL5- TR on feasibility study</b>	Rel-6	S2	No			Wed 03/01/01							
199	31006	<b>Speech Recognition and Speech Enabled Services</b>	Rel-6	S1	No	SRSETSG		Mon 08/10/01							
202	11021	TO BE DELETED AT CN#23-SES codec negotiation at SDP	Rel-6	N1	No			Mon 23/09/02							
273	31029	<b>Study of Feature Interactions Requirements (This should be deleted</b>	Rel-6	S1	Yes	FINT	TSG	Fri 08/11/02							

All the items under Security need to be checked. The present Work Plan shows the following:

ID	Unique_	Name	Release	Splittable	Resou	Modifi	Acro	Level of	Start	Qtr 1, 2001			Qtr 3, 2001			Qtr 1, 2002	
										Jan	Mar	May	Jul	Sep	Nov	Jan	Mar
73	1571	<b>Security enhancements</b>	Rel-6	No	S3	No	SEC1	TSG	Wed 03/01/01								
74	2026	<b>Enhanced HE control of security (includi</b>	Rel-6	No	S3	No			Wed 03/01/01								
75	2027	Stage 2	Rel-6	No	S3	No			Wed 03/01/01								
76	33006	Network domain security	Rel-6	No	S3	No	SEC1	TSG	Mon 17/06/02								
77	33007	IP network layer security (NDS/IP)	Rel-6	No	S3	No	SEC1	WG	Mon 17/06/02								
78	33017	<b>Network Domain Security; Authentication</b>	Rel-6	No	S3	No	SEC1	TSG	Fri 15/02/02								
79	33019	<b>Key Management of group keys for Voice</b>	Rel-6	No	S3	No	SECGTSG		Fri 26/09/03								

ID1571 (feature) should have disappeared, as the only BB under it (ID2026) should have been deleted (but the corresponding input to the Work Plan was never provided).  
 Also, in earlier version, ID33017 was a feature of its own but now it has been put under ID1571. It seems that ID1571 is a good home for ID33017 but there is no visibility of the corresponding decision of moving ID33017 under ID1571.

The history of ID1571 and related work items has to be clarified.

***Detailed changes***

The detailed changes are provided in the “notes” field of the modified WIs.

## General recurrent information

*This paragraph contains recurrent information provided to the reader not familiar with the 3GPP Work Plan.*

### **General description**

The Work Plan is a living document, aiming at providing co-operations between all the 3GPP TSGs and WGs to help them reaching common targets.

These targets are called “**Features**”, and are new or substantially enhanced functionality which represents added value to the existing system. A feature should normally embody an improved service to the customer and / or increased revenue generation potential to the supplier. The features are divided into “**Building Blocks**”, a BB being a set of technical functionality which would generally be expected to reside in a single system element, i.e. a single physical or logical entity or a single protocol. The Building Blocks are divided into “**Work Tasks**”, a WT being by definition handled by a single Working Group. The output of a work task is the creation of one or more new Technical Specifications (or Reports) and / or Change Requests to existing TSs / TRs.

These definitions are extracted from SP-000109.

This tree structure is established to ease the monitoring of the 3GPP work progress for R00, and to make explicit the purpose of the work assigned to one WG in the global system.

A **Work item** is a generic term to refer to a *feature, building block or work task*, i.e. all the lines of the Work Plan are work items. A full description of the a work item can be found in the 3GPP Working Procedures, available at [http://www.3gpp.org/About\\_3GPP/3gpp\\_wp.zip](http://www.3gpp.org/About_3GPP/3gpp_wp.zip) .

The Work Plan is provided in the form of a Gantt chart: the left part contains the names and attributes of the Work Items, the right part contains a calendar view reflecting the work progress (blue and grey lines apply to foreseen tasks, black lines for completed tasks).

The indentation of WI names reflects the hierarchical level in the tree structure (Features, Building Blocks, and Work Tasks).

A "Tracking Gantt" is used. This means that below each Gantt line (horizontal blue line in the right part of the document), there is a thin horizontal black line showing the previously foreseen start and end dates. This enables tracking the slipping of dates. This is reset after each plenary.

### **Attributes applicable to a WI**

From the Work Plan perspective, a WI is fully characterised by the following set of attributes:

1. Unique ID
2. Name
3. Release (based on the completion date). It applies to non-splitable features. If the feature is splitable, it applies to each individual Building Block composing the feature, provided that the Building Blocks are non-splitable. It does not apply to Feasibility Studies, Testing nor Charging Activities.
4. Splitable: defines whether the WI has to be considered as a single block or if it can be realised onto different releases
5. Acronym
6. Resource name: defines the responsible WG or TSG
7. Modified (see next section)
8. Modified since last TSG (see next section)
9. Start
10. Finish
11. % completed
12. Impacted TS and TR
13. Approval Level: MCC<CHAIR<WG<TSG. Each level can delete the proposal from the levels below. Only TSG Approved Wis are officially approved. All the other Wis are proposals, more or less stable according to the approval level.
14. Last modif, containing the date of the last modification. Note: this field has been recently added. The value has been initialised to April, 1<sup>st</sup>.
15. Hyperlink (to the proposed/approved WI coversheet)
16. WI rapporteur name

17. WI rapporteur e-mail
18. MCC responsible: defines who in MCC is responsible in monitoring the overall Feature.
19. Notes (free field).

The fields Start, Finish and % completed are calculated for summary tasks.  
For better readability, only some of these attributes are shown in the PDF views.

### ***How the changes on the Work Plan are tracked?***

The changes are tracked at two level: a global one, stressing out the overall changes of the Work Plan, and a more detailed one, making use of the “notes” field.

#### ***Global level***

The global level is a text of some paragraphs listing the main changes. For readability reasons, the global level is not part of the MS Project Work Plan but is contained in this present Work Plan cover page.

The global level shall at least:

- Report creation and deletion of Features and Building Blocks. It is not requested to mention the creation and deletion of Work Tasks (but this can be done if judged relevant by the MCC responsible person).

The global level is updated before each set of plenary meetings.

#### ***Detailed level***

The detailed level is a set of comments provided in the “notes” field text of each modified WI (a WI is identified by its Unique ID).

Even at the “detailed level”, not all the modifications have to be mentioned: some fields are by nature subject to constant updates (e.g. “% completed”), so it would be a waste of time to keep track of these changes.

The fields subject to change tracking are the following ones:

- Name
- Release
- Splitable (defines whether the WI has to be considered as a single block or if it can be realised onto different releases)
- Acronym
- Resource name (defines the responsible WG or TSG)
- Finish date

The other ones -listed below- are not subject of change tracking. Change tracking on these ones is up to the MCC responsible person. These are:

- % completed
- Impacted TS and TR
- Level of Approval (MCC<CHAIR<WG<TSG).
- Hyperlink (to the proposed/approved WI coversheet)
- WI rapporteur name
- WI rapporteur e-mail
- MCC responsible: defines who in MCC is responsible in monitoring the overall Feature.
- Notes (free field).
- Start date

The detailed level is updated each time a line is modified or created. In addition, a new field called “last modif” has been created (initialised to April, 1<sup>st</sup>) to provide the date of the latest modification of the WI.

## **History**

This section is reset after each plenary meeting.

Content of this package:

1) Master:

Work\_Plan\_3GPP\_Rel6\_040311\_MSP98.mpp                      Work Plan in MS Project 98  
format (contains all WI attributes and Gantt view)

Work\_Plan\_3GPP\_Rel6\_040311\_MSP2000.mpp                      Work Plan in MS Project 2000  
format (contains all WI attributes and Gantt view)

2) Cover page:

Work\_plan\_cover\_040311.doc                      Cover page - contains explanations and  
informations on last changes

3) Work Plan in different formats, useful if you don't have MS Project:

Work\_Plan\_3GPP\_Rel6\_040311.xls                      Work Plan in Excel format (contains  
most of the WI attributes but not the Gantt chart)
