Attachments: TS 23.241 v1.1.1

1. Overall Description:

This LS conveys the latest version of TS23.241, 3GPP Generic User Profile Stage 2 Data Description Method, for your information, and proposes some assignments for some future work for your consideration and decision.

TS23.241 version 1.0.0 was presented to TSG-T#22 December 2003 for information. T2 have now completed the TS23.241 to the level required for submission to TSG-T#23 March 2004 for approval. The latest version is attached for your information.

2. Proposals

1. T2 would like to propose to CN4 that their work on TS29.240 be based on TS23.241, and TS23.241 be referenced in TS29.240.

2. T2 would like to propose to CN4 that further work in the area of Common Definitions (Properties) Schemas be carried out in CN4 in TS29.240.

3. T2 would like to propose to CN4 that Templates for GUP (Profile) Component Schemas are already well-developed in TS23.241, and therefore TS23.241 be the TS for all further work in this area.

4. T2 is of the opinion that alignment between TS23.241 and TS29.240 is still an open item. T2 further proposes that this topic, and work coordination, be a topic for the Joint Meeting between T2SWG2 and CN4 confirmed for April 21 co-located with the T2#25 Meeting listed below.

3. Actions:

To CN4, SA2, CN5 groups.

ACTION: CN4 –

T2 requests CN4 group to kindly consider and respond to the above 4 proposals. T2 proposes that these be discussed in the Joint meeting CN4-T2SWG2 April 21st.

ACTION: SA2, SA5, CN5 –

T2 requests these Groups to kindly review the TS for their information and possible future use.

3. Date of next T2 Meetings:

T2#25	19 – 23 Apr 2004	Edinburgh, UK
