Title: Extension Request for SCUDIF
Agenda item: 9.21
Document for: APPROVAL

Release 6 Submission form

Feature / Item:		Service change and UDI fallback (TEI6)						
Affects:	UE/MS:X	CN:X	UTRAN: X	GERAN:	Compatibility Issues:	Yes:	No:	
Expected Completion Date:	June 2005							
Services impacted:	SCUDIF							
Specifications affected:	TS 23.172, TS 25.413, and possibly others							
Tasks within work which are not complete:	Network initiated upgrade from speech to multimedia							
Consequences if not included in Release 6:	The service change from speech to multimedia will not be able to be performed although it is a stage 1 requirement.							
Accepted by TSG#	27	for late inclusion in Release 6:						

Abstract of document:

The aim of this document is to ask SA to grant CN3 with an exemption for the Service change and UDI fallback for Rel-6.

Contentious Issues:

In Rel-6 the concept of network initiated SCUDIF was introduced for Service change and UDI fallback.

As stated in TS 22.201 there is a requirement to perform this capability in two different cases: downgrade from multimedia to speech when the conditions to sustain a multimedia call are no longer supported, and upgrade from speech to multimedia when the conditions to sustain the latter are again in place.

During CN3 #35 a full solution for the downgrade case was approved and a discussion was started on the stage 2 requirements needed to perform the upgrade. A solution for the upgrade case was also proposed but not yet agreed.

In order to be fully compliant with the stage 1 requirement CN3 asks SA to grant an exemption for the Service change and UDI fallback for Rel-6. This will allow CN3 to complete the work by June 2005 plenary.
