1. Overall Description:

SA2 thanks CT4 for the LS for clarification of SA2 requirement on Presence.
SA2 have discussed issues, and concluded that the SA1 requirements adopted in the CT4 LS are correctly reflected in the stage2 TS 23.141:the presence attributes and information model are defined in section 6 to describe the presentity.

In specific to the I-WLAN case, the 3GPP WLAN Access status is presence information to PNA as resources from the PLMN to help construct the presentity tuple.

2. Actions:

SA2 kindly asks CT4 take into account the above clarification.

3. Date of Next SA2 Meetings:

SA2 #47	27ᵗʰ June – 1ˢᵗ July 2005	Montreal, Canada
SA2#48	5ᵗʰ – 9ᵗʰ September 2005	Sophia Antipolis, France
