

TSG RAN meeting #4
Miami 17 - 19 June 1999

TSGR#4 (99)394

To: TSG RAN Working Groups 1, 3,4
cc: CEPT ERC TG1
Source: Lucent Technologies [TSG RAN]
Title: **[draft] LS on Cross Border co-ordination for UMTS systems
(forwarding of LS from ERC TG1)**

TSG RAN has received a liaison statement from CEPT ERC TG1 on Cross Border co-ordination for UMTS systems.

This liaison statement asks questions which are within the responsibility of Working Groups 1, 3 and 4:

WG1: Code utilisation
WG3: possible implications on UTRAN architecture
WG4: Issues related to cell planning.

TSG RAN believes that the answers to some of the questions would require input from more than one working group. Therefore a response would need to be sent by TSG RAN.

ERC has requested a response for its next meeting, on 2-3 September 1999. TSG RAN does not meet again before this date.

In order that ERC TG1 can have information available for its next meeting, TSG RAN requests WG1, 3 and 4 to draw the attention of their experts to the importance of cross-border co-ordination in Europe, and request them to provide input to the next meeting of ERC TG1 through their companies.
