Presentation of Specification to TSG or WG

Presentation to:	**RAN Meeting #6**
Document for presentation:	**TS 25.331, Version RAN2#8/9 Intermediate**
Presented for:	**Information**

Abstract of document:

The specification describes the Radio Resource Control protocol for the UE-UTRAN radio interface.

Changes since last presentation to RAN Meeting #5:

This intermediate version of RRC specification was produced between the RAN WG2 meeting #8 and RAN WG2 meeting #9 and incorporates the following CRs that where agreed at RAN WG2 meeting #8.

1. CR001 (R2-99f81)

2. CR018 (R2-99e67)

3. CR025 (R2-99f20)

4. CR028 (R2-99f23)

5. CR038 (R2-99e44)

6. CR039 (R2-99f73)

7. CR050 (R2-99g35)

8. CR017 (R2-99e65)

All other CRs presented to RAN meeting #6 are based on this intermediate version.

Outstanding Issues:

1. Downlink outer loop power control

2. Contents of UE capability message

3. ASN.1 description

4. Contents of RRC initialisation information passed between RNCs during SRNS relocation.

5. Signalling associated to LCS

6. Part of broadcast information associated to cell selection/re-selection

7. Broadcast information associated to CPCH

8. Gated Transmission

Contentious Issues:
