

Source : RAN WG1 Chairman

Object: R99 Cover Sheet: CPCH (FDD only)

The following item is proposed to be still included in Release -99.

**Release 1999 Submission form**

|  |                 |  |   |                              |                  |
|--|-----------------|--|---|------------------------------|------------------|
| <b>Work Area / Item:</b>                             |                 | <b>CPCH (Common Packet Channel )</b>       |   |                              |                  |
| <b>Affects:</b>                                      | <b>UE/MS: X</b> | <b>CN:</b>                                 | <b>UTRAN: X</b>   | <b>Compatibility Issues:</b> | <b>Yes: No:X</b> |
| <b>Expected Completion Date:</b>                     |                 | <b>3/2000</b>                              |   |                              |                  |
| <b>Services impacted:</b>                            |                 | <b>Packet data services in uplink</b>      |   |                              |                  |
| <b>Specifications affected:</b>                      |                 | <b>25.211, 25.213 &amp; 25.214</b>         |   |                              |                  |
| <b>Tasks within work which are not complete:</b>     |                 |  | <b>The issues with respect CPCH channel monitoring and possible use of channel assignment needs to be concluded</b>                 |                              |                  |
| <b>Consequences if not included in Release 1999:</b> |                 |  | <b>None (Has been suggested to be more efficient for uplink packet data operation in certain scenarios than existing solutions)</b> |                              |                  |
| <b>Accepted by TSG#</b>                              |                 | <b>for late inclusion in Release 1999:</b> |   |                              |                  |
