TSG-RAN Meeting #12   **RP-010408**

Stockholm, Sweden, 12-15 June 2001

Source: **Rapporteur**

Title: **Status Report of Study Item: Improvement of RRM across RNS and RNS/BSS**

Document for: **Information**

Status

At TSG RAN WG3 #21, the discussion of: "Improvement of RRM across RNS and RNS/BSS" has been started but because of the shortage of time there was almost no progress and SI sheet had not been discussed. To review the scope of SI sheet as 3GPP TSG RAN requested to TSG RAN WG3, the email discussion has been done and the SI sheet was revised to more general.

At TSG RAN WG3 #21, TR v0.0.2 (R3-011463) was approved and TR contains outline.

Open Issues

None was brought up so far.

Proposal

It is proposed to endorse the TR v0.0.2 at TSG RAN #12.
