

Status Report for WI to TSG

Work Item Name: Radio access bearer support enhancement

SOURCE: Rapporteur

TSG: RAN

WG: 2

E-mail address rapporteur: juha.mikola@nokia.com

Ref. to WI sheet: RAN_Work_Items.doc

Progress Report since the last TSG (for all involved WGs):

RAN WG2:

WG2 is the leading group of this Work Item. CRs to introduce RFC3095 context relocation were submitted to RAN2#27 but they could not be treated due to lack of meeting time.

RAN WG3:

CR to 25.413 (REL-5) was agreed in RAN3#27 to add "RFC3095 Context Info" container to RANAP information elements "Forward SRNS Context" and "RANAP Relocation Information". Work in RAN3 is completed.

List of Completed elements (for complex work items):

List of open issues:

Estimates of the level of completion (when possible):

WI completion date review resulting from the discussion at the working group:

It seemed acceptable from RAN2 point of view that CRs could be brought to RAN#16 to include RFC3095 context relocation in Rel-5. Work in RAN3 is already completed.
