

## Status Report for WI to TSG

**Work Item Name: Iur Neighbouring Cell Info Reporting Efficiency Optimisation**

**SOURCE: Rapporteur (Ericsson)**

**TSG: RAN**

**WG: 3**

**E-mail address rapporteur: Elena.Voltolina@era.ericsson.se**

**Ref. to WI sheet: RAN\_Work\_Items.doc**

### **Progress Report since the last TSG (for all involved WGs):**

During RAN3 #27, it was agreed that the main addition on the Iur interface regarding the Neighbouring Cell Information is currently represented by Support Indicators. Therefore it was agreed to group such indicators within a common Cell Capability Container which will optimise the size increase for Release 5 and later releases. No other optimisation was felt to be necessary for the time being.

A CR (553, tdoc R3-020747) introducing the above mentioned feature in the RNSAP protocol was approved.

Technical report 25.884 was finalised and agreed as version 2.0.0.

### **List of open issues:**

None

### **Estimates of the level of completion (when possible):**

The WI can be considered finalised, the necessary support is in place and no open issues remain.

### **WI completion date review resulting from the discussion at the working groups:**

March 2002 (TSG RAN#15).

### **References to WG's internal documentation and/or TRs:**

TR 25.884 1.0.0 (R3-020817); TR 25.884 2.0.0 (R3-020818).
