**Introduction**

At the 7<sup>th</sup> meeting of ITU-R Working Party 8F in Queenstown, New Zealand, a liaison was written to External Organizations concerning the update of ITU-R Recommendation M.1457 for Revision 3 (for revision 2 references, the deadline is still 31 May 2002).

Please note that whilst this liaison has been approved by WP 8F, it has not been checked for consistency by the ITU-R SG 8 counsellor's office, nor the IMT-2000 program manager.

## Working Party 8F

### R-TECH

#### **[DRAFT] Liaison statement to relevant external organisations on the schedule for updating Recommendation ITU-R M.1457 to Revision 3<sup>1</sup>**

#### **Background**

ITU-R Working Party 8F thanks the External Organisations for their outstanding effort in the compilation of M.1457 "Detailed specifications of the radio interfaces of IMT-2000", Revision 2, for the terrestrial radio interfaces.

At the 6<sup>th</sup> meeting of WP 8F in Tokyo, Japan a liaison<sup>2</sup> was generated to SDO's detailing the specific requirements for finalization of the transposition process and the development of the specific reference links for the 5.X.2 sections for M.1457 Revision 2.

Furthermore, it is recognized that, per the "Roadmap for current work relevant to future updates of Recommendation ITU-R M.1457"<sup>3</sup>, EO's may be updating the respective terrestrial components of M.1457 as outlined in the Roadmap. Should an update be deemed necessary by WP 8F it will consequently become the third revision of M.1457 (M.1457-3), which would be submitted by WP 8F to the February 2003 meeting of SG 8. This liaison provides guidance to the relevant External Organizations for the terrestrial component of M.1457-3, along with a timeline and tasks required in order to produce the update effectively.

#### **Baseline document for updates**

The baseline document that shall be used by WP 8F in their internal work and by the External Organizations in submitting their changes for development of the terrestrial component M.1457-3 shall be the version as adopted by correspondence by ITU-R Study Group 8 (or such version as

<sup>1</sup> This liaison is also being copied to ITU-R WP 8D

<sup>2</sup> This document (8F/489 Chapter 6 Attachment 6.3) is available from the ITU IMT-2000 Program Manager's office

<sup>3</sup> This documents (8F/489 Chapter 6 Annex 3) is available from the ITU IMT-2000 Program Manager's office

suggested by the ITU-R BR Counsellor). The IMT-2000 Project Manager, under separate cover, will be providing on a CD-ROM to the relevant External Organizations receiving this liaison the baseline document referred to above and other appropriate materials that External Organizations might find useful. This ensures that edits and submissions will be performed on fully synchronized document sets.

## Schedule

Note that in order to be consistent with the assumed annual update cycle as defined in Circular Letter 8/LCCE/095 for M.1457, (in this case the third Revision, M.1457-3), and to be adopted by the next meeting of SG 8, the first meeting in the complete three-meeting cycle which would conclude with the September 2002 meeting of WP 8F, has already occurred (Feb 02).

It is also noted that the aforementioned Circular Letter states "the cycle applies independently for each proposal received". In accordance with the Circular Letter, a proposal "A" could be received at the May 2002 meeting, which would then be the "x" meeting for that proposal "A". A proposal "B" could also be received at the Sept 2002 meeting, and that would be meeting "x" for that proposal "B". In accordance with the Circular Letter, these proposals could be accepted for inclusion in to a 1457-3 update to be forwarded to SG 8 at year-end 2002. However, as also noted in the Circular Letter, the complete three meeting cycle may be required for these submissions, and therefore the proposals would be incorporated in to an update which would be forwarded to SG 8 at year-end 2003.

The schedules for ITU-R Working Party 8F, Study Group 8, and the Radio Assembly are included in Table 2

TABLE 1

### Summary of inputs or correspondence required for terrestrial component updates in the third revision of Rec. ITU-R M.1457

| Section | Item   | Final Date <sup>4</sup> |
|---------|--|-------------------------|
| 5.X.1   | Overview section required                    | 18 Sept 2002            |
| 5.X.2   | Titles and tables required                   | 18 Sept 2002            |
| 5.X.2   | Final references required                    | 1 Apr 2003              |
|         | Global Core Specification submitted          | 18 Sept 2002            |
|         | Letters of conveyance                        | 18 Sept 2002            |
|         | Self declarations of consistency             | 18 Sept 2002            |
|         | Certifications of references & transposition | 1 Apr 2003              |
|         | SG8  | Feb - 2003              |

**Table 1 Note 1:** The submission dates referenced above are the final dates for documents to be received by the Secretariat Office (either directly as inputs or via the IMT-2000 Project manager's office as appropriate) for consideration by the respective meeting of WP 8F as delineated in the announcing Circular Letter 8/LCCE/095.

<sup>4</sup> This date assumes that there will be a 1457-3 submission to SG 8 in Feb 2003 that includes a terrestrial component update. It further presumes in conjunction with Circular Letter 8/LCCE/095, that technologies received by this date have been determined by WP 8F to be acceptable for inclusion without requiring the full three-meeting cycle.

**Table 1 Note 2:** Letters of conveyance and certifications of references & transposition should be submitted to the ITU IMT-2000 Project Manager per established procedures.

**Table 1 Note 3:** The baseline document that shall be used by WP 8F in their internal work and by the External Organizations in submitting their changes for development of the M.1457-3 update shall be the version as adopted by correspondence by ITU-R Study Group 8 (or such version as suggested by the ITU-R BR Counsellor). The IMT-2000 Project Manager can provide the appropriate baseline materials.

**TABLE 2**

**WP 8F, SG 8 and RA Meetings affecting Recommendation ITU-R M.1457 Revision 3**

| <b>Meeting</b> | <b>Date</b>                    |
|----------------|--------------------------------|
| WP 8F #8       | 29 May – 4 June 2002           |
| WP 8F #9       | 25 September – 2 October, 2002 |
| WP 8F #10      | 19-26 February 2003            |
| SG 8           | 4-5 February 2003              |
| RA             | 2-6 June 2003                  |
| SG 8           | December 2003                  |

It is requested that relevant External Organizations provide to WP 8F for the 8<sup>th</sup> meeting a table similar to the above delineating critical meeting dates in order to assist the WP 8F secretariat in adequately planning future update schedules for M-1457.
