Attachments:

R2-021902 "Addition of alternative configuration using Turbo Coding for Interactive or background / UL:8 DL:8 kbps / PS RAB + UL:3.4 DL:3.4 kbps SRBs"

R2-021881 "Introduction of streaming 16/128 kbps PS RAB + Interactive or background 8/8 kbps PS RAB + 3.4 kbps SRB

1. Overall Description:

RAN2 would like to inform RAN1 about the discussion on addition of the following RABs configuration in 34.108 (see included attachments for detailed proposals):

- Alternative configuration using Turbo Coding for Interactive or background / UL:8 DL:8 kbps / PS RAB + UL:3.4 DL:3.4 kbps SRBs
- Streaming 16/128 kbps PS RAB + Interactive or background 8/8 kbps PS RAB + 3.4 kbps SRB

Since no agreement could be reached during the meeting to introduce these RABs in 34.108 it was decided to technically endorse the proposals from the RAN2 point of view and let the final decision to RAN whether the proposed CRs to 34.108 are acceptable for R99.

RAN2 has also been discussing the various uses of 34.108 and is wondering for how long new configurations should be added.

2. Actions:

To RAN 1 group.

ACTION: RAN2 asks RAN1 group to discuss the attached proposals and indicate to RAN whether these RAB configurations are technically correct from the RAN1 point of view.

To RAN.

ACTION: Discuss the evolution of 34.108 and take appropriate actions on the included CRs.

3. Date of Next RAN2 Meetings:

RAN2_32 23 – 27 September 2002 Xi'an, China.

RAN2_33

11 – 15 Nov 2002

Sophia-Antipolis, France.

CHANGE REQUEST

⌘ 34.108 CR ⌘ rev - ⌘ Current version: **3.8.0** ⌘

For **HELP** on using this form, see bottom of this page or look at the pop-up text over the ⌘ symbols.

Proposed change affects: UICC apps ⌘ ME Radio Access Network Core Network ⌘

Title:	⌘ Introduction of streaming 16/128 kbps PS RAB + Interactive or background 8/8 kbps PS RAB + 3.4 kbps SRB	
Source:	⌘ T-Mobile, Siemens AG	
Work item code:	⌘ Date: ⌘ 19/08/2002	
Category:	⌘ F Use <u>one of the following categories:</u> F (correction) A (corresponds to a correction in an earlier release) B (addition of feature), C (functional modification of feature) D (editorial modification) Detailed explanations of the above categories can be found in 3GPP TR 21.900 .	Release: ⌘ R99 Use <u>one of the following releases:</u> 2 (GSM Phase 2) R96 (Release 1996) R97 (Release 1997) R98 (Release 1998) R99 (Release 1999) Rel-4 (Release 4) Rel-5 (Release 5) Rel-6 (Release 6)

Reason for change:	⌘ There is currently no DL streaming PS RAB for high quality streaming applications (> 64kbps) specified in the conformance and test specifications.	
Summary of change:	⌘ It is proposed to add the following combination of RABs and signalling RBs <ul style="list-style-type: none"> • Streaming / unknown / UL:16 DL:128 kbps / PS RAB + Interactive or background / UL:8 DL:8 kbps / PS RAB + UL:3.4 DL:3.4 kbps SRBs for DCCH 	
Consequences if not approved:	⌘ Support of the proposed reference radio bearer is currently not included in the conformance and test specifications. Inclusion in 34.108 needed to assure functionality. Use of high quality streaming applications may be unsupported.	

Clauses affected:	⌘ 6.10.2.1, 6.10.2.2, 6.10.2.4.1.X, 6.10.2.4.1.X.2

How to create CRs using this form:

Comprehensive information and tips about how to create CRs can be found at <http://www.3gpp.org/specs/CR.htm>. Below is a brief summary:

- 1) Fill out the above form. The symbols above marked ~~%~~ contain pop-up help information about the field that they are closest to.
- 2) Obtain the latest version for the release of the specification to which the change is proposed. Use the MS Word "revision marks" feature (also known as "track changes") when making the changes. All 3GPP specifications can be downloaded from the 3GPP server under <ftp://ftp.3gpp.org/specs/> For the latest version, look for the directory name with the latest date e.g. 2001-03 contains the specifications resulting from the March 2001 TSG meetings.
- 3) With "track changes" disabled, paste the entire CR form (use CTRL-A to select it) into the specification just in front of the clause containing the first piece of changed text. Delete those parts of the specification which are not relevant to the change request.

6.10.2 RAB and signalling RB for FDD

6.10.2.1 RABs and signalling RBs

In the following clauses, the typical parameter sets are presented for reference RABs, signalling RBs and important combinations of them. The data rate given for each RAB is the maximum data rate that can be supported by that RAB.

NOTE: The granularity for each RAB needs to be clarified.

Table 6.10.2.1.1: Prioritised RABs.

6.10.2.2 Combinations of RABs and Signalling RBs

In the present document, physical channel parameters for following combinations of RABs and signalling RBs on a CCTrCH are described.

NOTE: It is understood that for speech service the AMR mode may be operated asymmetrically for the uplink and downlink.

Combinations on DPCH

- 1) Stand-alone UL:1.7 DL:1.7 kbps SRBs for DCCH.

CHANGE REQUEST

⌘ 34.108 CR CRNum ⌘ rev - ⌘ Current version: 3.8.0 ⌘

For **HELP** on using this form, see bottom of this page or look at the pop-up text over the ⌘ symbols.

Proposed change affects: ⌘ (U)SIM ME/UE Radio Access Network Core Network

Title:	⌘ Addition of alternative configuration using Turbo Coding for Interactive or background / UL:8 DL:8 kbps / PS RAB + UL:3.4 DL:3.4 kbps SRBs for DCCH	
Source:	⌘ Nortel Networks	
Work item code:	⌘ TEI	Date: ⌘ 2002-08-21
Category:	⌘ F	Release: ⌘ R99
Use <u>one</u> of the following categories: F (correction) A (corresponds to a correction in an earlier release) B (addition of feature), C (functional modification of feature) D (editorial modification) Detailed explanations of the above categories can be found in 3GPP TR 21.900 . Use <u>one</u> of the following releases: 2 (GSM Phase 2) R96 (Release 1996) R97 (Release 1997) R98 (Release 1998) R99 (Release 1999) REL-4 (Release 4) REL-5 (Release 5)		

Reason for change:	⌘ For all the existing RAB combinations containing an 8 kbps PS RAB, the transport channel configuration of the 8kbps PS RAB is using either Turbo Coding or alternatively Convolutional Code (only in some cases). The only exception is the combination Interactive or background / UL:8 DL:8 kbps / PS RAB + UL:3.4 DL:3.4 kbps SRBs for DCCH for which the coding for the 8/8 kbps PS RAB is CC only. It is considered that the test coverage of this combination is incomplete without the TC alternative.
Summary of change:	⌘ The Turbo Coding is added as an alternative of the 8/8 PS RAB transport channel coding in the combination Interactive or background / UL:8 DL:8 kbps / PS RAB + UL:3.4 DL:3.4 kbps SRBs for DCCH. There is no impact on any other RAB combination.
Consequences if not approved:	⌘ Incomplete test coverage of the combination Interactive or background / UL:8 DL:8 kbps / PS RAB + UL:3.4 DL:3.4 kbps SRBs for DCCH

Clauses affected:	⌘ 6.10.2.4.1.23a
Other specs affected:	⌘ <input type="checkbox"/> Other core specifications <input type="checkbox"/> Test specifications <input type="checkbox"/> O&M Specifications
Other comments:	⌘

How to create CRs using this form:

Comprehensive information and tips about how to create CRs can be found at <http://www.3gpp.org/specs/CR.htm>. Below is a brief summary:

- 1) Fill out the above form. The symbols above marked ⌘ contain pop-up help information about the field that they are closest to.

- 2) Obtain the latest version for the release of the specification to which the change is proposed. Use the MS Word "revision marks" feature (also known as "track changes") when making the changes. All 3GPP specifications can be downloaded from the 3GPP server under <ftp://ftp.3gpp.org/specs/> For the latest version, look for the directory name with the latest date e.g. 2001-03 contains the specifications resulting from the March 2001 TSG meetings.
- 3) With "track changes" disabled, paste the entire CR form (use CTRL-A to select it) into the specification just in front of the clause containing the first piece of changed text. Delete those parts of the specification which are not relevant to the change request.
