

<b>Title</b>	<b>Proposed procedure to enable TSG RAN to provide necessary material to ITU-R WP 8F for incorporation of updated IMT-2000 CDMA DS and IMT-2000 CDMA TDD in <u>Revision 4</u> of Rec. M.1457</b>
<b>Source</b>	<b>ITU-R Ad Hoc</b>
<b>Document for</b>	<b>Approval</b>
<b>Agenda Item</b>	<b>7.5</b>

---

This contribution and the attached slides provide an overview of the proposed procedure that would enable TSG RAN to provide all necessary material to ITU-R WP 8F in order to ensure proper incorporation of updated IMT-2000 CDMA DS and IMT-2000 CDMA TDD into Revision 4 of Rec. M.1457. The proposed procedure is intended to be compliant with the scheduled announced in the LS from ITU-R WP8F (contained in RP-020835).

The proposed procedure is very much reflecting what was done in the past for previous submission to ITU-R. In particular, an initial submission is foreseen in the March 2003 timeframe, announcing the content of the final submission that must occur by 1<sup>st</sup> October 2003. The initial submission can contain the description of some relevant Work Items or Study Items whose results will be reflected in the revised Overview section of M.1457 that will be sent to WP8F as part of the final submission. The initial submission will therefore reflect what was done for Revision 2 of M.1457 (see RP-010423). The detailed modifications to section 5.X.1 (Overviews) and 5.X.2 (Specifications of the radio interface) will be part of the final submission.

At the last PCG meeting there was a discussion on the involvement of MRPs in the process of editing the contributions toward ITU. In order to ensure appropriate and informed assistance from MRPs, it is proposed to have a face-to-face meeting of ITU-R Ad Hoc in preparation of RAN#19, and MRPs will be invited to participate. The ITU-R Ad Hoc meeting will be held on March, 3<sup>rd</sup> 2003. This would enable MRPs to be involved in the process since the preparation of the initial submission.
