

Status report of RAN WG2 to RAN #19

Denis Fauconnier

RAN WG2 Chairman

RP-030018

Main activities since last RAN Plenary

- **Release 99 corrections**

- Occupied 2 days of last meeting, number of CRs is down.

- **Release 4 corrections**

- Very few

- **Release 5**

- HSDPA corrections

- Completion of some TEIs

- **Release 6**

- Big progress towards MBMS architecture. Convergence of companies on key functions; reasonable synergy with SA2.

- Joint meeting with RAN3/SA5 on trace functionality.

- **RAN2 Chairman and Vice-Chairman were re-elected**

RAN WG2 statistics

Meetings held since last RAN Plenary

- **Joint RAN2/RAN3 ad-hoc on MBMS in Jan 03, UK**
- **RAN WG2 #34 in Feb 03, Sophia Antipolis**
 - Joint RAN2/RAN3/SA5 on Trace functionality

Liaison statements In/Out

Total number of documents per meeting

Rel 99 Change Request statistics (1)

Rel 99 Change Request statistics (2)

Release 99 activities

RP-030018

Change Requests on R99 specifications

- Refer to RP-030019 for complete list of RAN WG2 agreed CRs

PDCP/RLC/MAC/BMC

- **RLC**
 - 1 CR
- **MAC**
 - 2 CRs
- **PDCP**
 - No CR
- **BMC**
 - 1 CR

Cell selection/re-selection

- No CR

RRC

- **Number of CRs continues to decrease**
 - Size of the corrections is decreasing
 - Smaller CRs
- **Most CRs are either:**
 - Mostly worded as « UE should » in R99, « UE shall » in R4
 - Even the R99 « shall » that should not impact an educated UE implementation...

Release independant frequency bands

- No CR

34.109

- **One CR in RP-030108**

- Company revision needed to move mandatory text from a note to a normal paragraph. Revision in **RP-030162** (Panasonic)

25.993 RAB/RB examples

- 3 CRs
- **Recap on how this TR is handled:**
 - It is a release independent TR. Actual release from which a Radio Bearer applies is specified in the text
 - The current TR on which CRs are made is Release 6
 - CRs are handled in RAN WG2 under the Agenda Item of the applicable release
 - It was requested that in RAN Plenary, all CRs are under **Release 6** on the RAN Agenda Item

Other CRs submitted to Plenary under company name

- **RP-030146 on RRC from Motorola/Nokia**
 - Lack of time to complete it by e-mail.
- **Other**
 - E-mail agreement on the mandatory reading of SIB11/12. No CR provided, and the issue may be revisited if needed i.e. if the specification need to be made clearer. Anyway, everyone's understanding should now be common.

Release 4 activities

RP-030018

Release 4 CRs

- **Number of corrections decreases**
 - 1 CR on 25.305, 7 CRs on 25.331
- **Refer to RP-030019 for complete list**

Release 5 activities

RP-030018

Release 5 CRs

- **Corrections on HSDPA**
- **R5 TEIs completed on:**
 - Group release for RNC reset
 - NACC for UTRAN to GPRS network directed cell re-selection
 - RRC signalling optimisation
- **Refer to RP-030019 for complete list of CRs**
- **Agreement in RAN WG2 to extend Rel 5 deadline for the following subjects, if confirmed by RAN Plenary:**
 - Reducing the size of the "Inter RAT Handover Info" message
 - Release discussion...

HSDPA

- **Corrections of MAC and RRC**
- **Work with RAN WG3 on some RRM aspects on Iub interface**
- **Alignment with RAN WG1**
- **Analysis of HSDPA operation between L1 and upper layers**

Small Technical Enhancements and Improvements for Rel-5

- **NACC for 3G -> 2G HO was finalised**
- **Compression of RRC signalling was finalised**
- **Group release for RNC reset was finalised in RAN2**
 - CR 1880 on 25.331 in **RP-030120** complete for radio interface. Linked RAN3 CRs not available. However « group » feature needed in R5 UEs, and Iur could be decoupled.
- **Handover UTRAN/GERAN Iu mode**
 - Important progress on RAN2 understanding
 - List of comments was sent to GERAN and SA2

Release 6 activities

RP-030018

List of release 6 Work Items under RAN WG2

- MBMS
- Open interface between the SMLC and the SRNC within the UTRAN to support Rel-4 positioning methods
- Radio access bearer support enhancement
- UE positioning enhancements
- Terminal power saving

MBMS

- **Important progress was made on architecture aspects**
- **Subject attracting more and more contributions**
- **Many joint discussions with RAN WG3**
- **Principles for UE states handling have converged**
 - RRC connection is the baseline for UE states in MBMS
- **Work expected to progress in RAN WG1**
- **Next meetings expected to finalise the architecture/stage 2 and start on stage 3 design**
- **See status report**

Open interface between the SMLC and the SRNC within the UTRAN to support Rel-4 positioning methods

- **WI was completed**
 - CRs on PCAP provided to the plenary (specification under RAN WG3)
 - See status report

Small Technical Enhancements and Improvements for Rel-6

- none

Feasibility Study under RAN WG2

- Enhancements to OTDOA Positioning using advanced blanking methods

Enhancements to OTDOA Positioning using advanced blanking methods

- Work ongoing in RAN WG1.

Release 6 Items under other WGs

- **Joint meeting on Subscriber and Equipment trace with RAN3 and SA5**
 - Good understanding now of SA5 requirements/organisation of work
 - Main impacts are on RAN3, no RAN2 impact foreseen
 - Work Item to be proposed this week in Ran Plenary

Conclusions

Chairman's concluding remarks

- R99 is still an important part of RAN2 activity, but size and complexity of CRs is decreasing
- Resolving R99 problems takes time but corrections least (or not) affecting current UE implementations are found
- HSDPA complete. Correction phase well under way.
- Significant increase in MBMS activity, with convergence on previously contentious points
- R5 TEIs completed as planned. One last may be allowed for the next meeting.
- RAN WG2 moving towards 6 meetings a year
 - Some ad-hoc may be needed depending on workload
- Future work should be mainly on:
 - R99 corrections (still), IMS support, MBMS, Release 6 TEIs

Past work has been paying off
release 99 changes decrease, quality increases.

Please sustain efforts and keep experts active in RAN WG2
