

Status Report for WI to TSG

Work Item Name: Improving receiver performance requirements for the FDD UE

SOURCE: Rapporteur (Shimon Moshavi, Intel) **TSG:** RAN **WG:** 4

E-mail address rapporteur: Shimon.Moshavi@intel.com

Ref. to WI sheet: RAN_Work_Items.doc, Work Item 66

Progress Report since the last TSG (for all involved WGs):

There were discussions about whether to close this work item or to attempt to clarify its scope, which has been subject to different interpretation between delegates. A decision was made to recommend leaving open the work item for an additional meeting, due to the fact that there may be an additional contribution under the work item at the next RAN4 meeting. If no additional contributions are brought at the next RAN4 meeting, it is expected that this work item will be closed.

List of Completed elements (for complex work items):

Changes to the Soft Handover DCH demodulation performance requirements (TS 25.101, Sec. 8.7) were approved at RAN #16 according to [1].

List of open issues:

None

Estimates of the level of completion (when possible):

WI completion date review resulting from the discussion at the working group:

Originally December 2002. Currently open, but clarification expected at the next RAN4 meeting.
