Progress Report since the last TSG (for all involved WGs):
Possible mechanisms to satisfy the requirements 'priority' and 'delay' using the existing 'signalling indication' were discussed at RAN3#38. Text has been agreed for the study area of TR25.852.
Liaisons from other groups however confirmed RAN3 view that varying nature of traffic on the signalling RAB still makes differentiating signalling traffic at the radio bearer level difficult and therefore the outcome of the work in RAN3 depends on investigations in other groups.
TR was moved to version 0.2.0 and agreed.
