Progress Report since the last TSG (for all involved WGs):

Following RAN3 #42 in Montreal, Canada, document R3-040918 captures the latest
version of TR 25.901.

During this meeting, the Stage II work for NACC was completed and the corresponding
Stage 3 CRs were finalised.

List of Completed elements (for complex work items):
- NACC Architecture
- Format of GERAN ⇔ 3G RIM Messages
- Transfer of NACC information across the Iu to the CRNC.
- The "trigger" for NACC information update – is it UE or RNC based?
- Choice of RNSAP message to be used across the Iur.
- Request message format from RNC to BSC (via CN) in order to subscribe to be
  informed at any NACC related change.

List of open issues:

Agreement has been reached on all previous open issues.

Estimates of the level of completion (when possible):
100%

WI completion date review resulting from the discussion at RAN WG3:
