**Title: LS on Slow TPC**

---

RAN WG2 has discussed Slow TPC in this meeting again.

RAN WG2 understands that some modifications to the Slow TPC scheme currently described in the L1 specifications are being made. In this light, RAN WG2 would like to wait with including it into its specifications until the physical layer issues have been resolved in RAN WG1. RAN WG2 would also like to remind RAN WG1 at our LS from the previous meeting on the same issue, in which we seeked to be informed of the benefits of Slow TPC.
