**Title: Liaison to 3GPP TSG RAN WG2 and WG1 on system level protocol aspects  
cc: 3GPP TSG RAN**

---

In the terms of reference of 3GPP RAN WG4 it is stated the scope of the WG4: “Specification for radio performance and protocol aspects from a system point of view”.

Based on the above mentioned terms of reference, a discussion occurred in WG4 on how to deal with protocol aspects.

WG4 asks WG2 and WG1 to provide those documents on protocol aspects produced by the various SDO's which can be relevant for the WG4 activity.

Moreover, it would be appreciated any suggestion or comment related to protocol aspects and parameters that could be in the field of competence of WG4.
