**Title:** Proposed LS to WG3 concerning transmission delay over Iur and Iub

**Document for:** Approval

---

TSG-RAN Working Group 2 seeks the opinion of TSG-RAN Working Group 3 regarding the order of transmission delay over Iub and Iur for the different transport channels RACH, FACH, DSCH and DCH.

We are particularly interested in knowing this in order to determine the roundtrip delay for receiving FACH-ACK from MAC-C in RNC compared to the case when MAC-C is located in Node B. The answer would help TSG-RAN WG2 reach a consensus on the selected termination point for MAC-C.
