Title: Liaison statement on monitoring of UTRA FDD cells

TSG RAN WG4 would like to thank TSG RAN WG1 for the information on the UTRA FDD cell monitoring currently specified in S1.31.

TSG RAN WG 4 has not discussed the measurement accuracy of E_c/I_0 of the primary CCPCH at this time. TSG RAN WG 4 would welcome further information from both RAN WG 1 and RAN WG 2 to help progress work in this area. Information on the reporting scheme and any proposals for the measurement format would be most helpful.
