3GPP TSG-SA Codec Working Group   *TSGS4#4(99)145*
TSG-S4#4: April 20-22, 1999, Munich, Germany

Liaison To: **TSG-CN, TSG-S2, TSG-R3**

From: **TSG-S4 Codec Working Group**

cc:

Subject: **3GPP Call Set-up Requirements for Circuit Switched Multimedia Telephony Service**

TSG-S4 (Codec WG) has prepared a preliminary technical specification "*26.112 V.1.0.0; Codec for Circuit Switched Multimedia Telephony Service; Call Set-up Requirements*" in attached Tdoc S4(99)124.

Having come to this point, TSG-S4 admits that it most probably does not have the required full technical expertise to finalise a detailed call control specification. Also, some introduced issues need to be reflected in 3GPP call control related technical specifications, development of which is under the mandate of TSG-CN.

TSG-S4 feels that this document should be considered as preliminary input for specifying the call set-up procedures and interworking scenarios for circuit switched multimedia telephony services in 3GPP networks. Therefore, it liaises this specification for the above mentioned 3GPP WGs for information and comments.

TSG-S4 will meet next time during June 14-16. Any comments from the other 3GPP working groups are welcomed before the next meeting.
