

TSG-RAN Working Group 3 meeting #4
Warkick, England 1 - 4 June 1999

TSGW3#4(99)42!

Agenda Item: UTRAN Architecture

Source: Editor (Nortel Networks)

Title: TS 25.435 UTRAN Iub Interface User Plane Protocols for
COMMON TRANSPORT CHANNEL Data Streams V0.1.1

Document for: Approval

Note : Revision marks reflect changes from WG3#3 decisions.

Intellectual Property Rights

[IPRs essential or potentially essential to the present deliverable may have been declared to ETSI/3GPP. The information pertaining to these essential IPRs, if any, is publicly available for ETSI members and non-members, free of charge. This can be found in the latest version of the ETSI Technical Report: ETR 314: "Intellectual Property Rights (IPRs); Essential or potentially Essential, IPRs notified to ETSI in respect of ETSI standards". The most recent update of ETR 314, is available on the ETSI web server or on request from the Secretariat.

Pursuant to the ETSI Interim IPR Policy, no investigation, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in the ETR 314, which are, or may be, or may become, essential to the present document.]

Note: The content has to be reviewed according to the 3GPP IPR rules

Foreword

This Technical Specification (TS) has been produced by the 3rd Generation Partnership Project (3GPP). The contents of this TS are subject to continuing work within 3GPP TSG RAN and may change following formal TSG RAN approval. Should the TSG modify the contents of this TS, it will be re-released with an identifying change of release date and an increase in version number as follows:

Version m.t.e

where:

m indicates [major version number]

x the second digit is incremented for all changes of substance, i.e. technical enhancements, corrections, updates, etc.

y the third digit is incremented when editorial only changes have been incorporated into the specification.

Introduction

*This clause is optional. If it exists, it is always the third unnumbered clause.
No text block identified.*

1 Scope

This document shall provide a description of the UTRAN RNC-Node B(Iub) interface user plane protocols for Common Transport Channel data streams as agreed within the TSG-RAN working group 3.

Note : by Common Transport Channel one must understand RACH, FACH and DSCH.

2 References

References may be made to:

- a) specific versions of publications (identified by date of publication, edition number, version number, etc.), in which case, subsequent revisions to the referenced document do not apply;
- b) all versions up to and including the identified version (identified by "up to and including" before the version identity);
- c) all versions subsequent to and including the identified version (identified by "onwards" following the version identity); or
- d) publications without mention of a specific version, in which case the latest version applies.

A non-specific reference to an ETS shall also be taken to refer to later versions published as an EN with the same number.

[1] Merged version of Iub interface Description

Editor's Note : [1] is a temporary reference only to ease the definition of what should be in the different sections of this document.

3 Definitions, symbols and abbreviations

3.1 Definitions

[Editor's note: For list of definitions, see [1]. Only definitions specific to this document are listed below, in order to avoid inconsistency between documents. When list is stable, definitions relevant for this document should be extracted.]

3.2 Symbols

3.3 Abbreviations

[Editor's note: For list of abbreviations, see [1]. Only abbreviations specific to this document are listed below, in order to avoid inconsistency between documents. When list is stable, abbreviations relevant for this document should be extracted.]

4 General aspects

4.1 Common Transport Channel Data Stream User Plane Protocol Services

4.1.1 RACH/FACH Data Streams User Plane Protocol Services

[Editor's Note: This chapter describes the services that the User Plane Protocols provide such as data transfer, flow control, etc.]

4.1.2 Downlink Shared Channels Data Streams User Plane Protocol Services

[Editor's Note: This chapter describes the services that the User Plane Protocols provide such as data transfer, flow control, etc.]

4.2 Services expected from data transport

5 Frame Structure and Coding

- 5.1 Data frame structure
 - 5.1.1 RACH/FACH Channels
 - 5.1.2 Downlink Shared Channels
- 5.2 Control frame structure
 - 5.2.1 RACH/FACH Channels
 - 5.2.2 Downlink Shared Channels
- 5.3 Coding

6 Data Streams User Plane Procedures

[Editor's Note: This chapter specifies the user plane procedures for RACH/FACH data streams. Typical related scenarios at Iub interface should be described.]

- 6.1 Data Transfer
 - 6.1.1 RACH/FACH Channels
 - 6.1.2 Downlink Shared Channels
- 6.2 Flow Control
 - 6.2.1 RACH/FACH Channels
 - 6.2.2 Downlink Shared Channels
