**Title:** **Liaison Statement on** Adaptation of 23.060 terminology with the N1 terminology agreement

**Agenda Item:** 5.2.3

**To:** TSG CN WG1, TSG SA WG1

**Cc:** TSG SA

*3GPP TSG-SA WG2  
Tokyo, JAPAN  
6 – 10 March 2000*

*Tdoc 3GPP S2-000611*

TSG SA WG2 thanks TSG CN WG1 for their liaison statement regarding the use of terminology in the N1 specifications (Tdoc N1-000452).

TSG SA WG2 is please to inform TSG CN WG1 that S2 has agreed to adopt the N1 proposed terminology. It is acknowledged that this will improve the quality and consistency of the specifications.

Furthermore, TSG SA WG2 would like to inform TSG SA WG1 and TSG SA plenary that TSG CN WG1 and TSG SA WG2 have reached this agreement and that the terminology and rules described below are used.

To align the terminology the following rules are used to define specific system descriptions:

**Inter-System change** is a change of radio access between different radio access technologies such as GSM and UMTS.

The label **(GSM only)** indicates this section or paragraph applies only to GSM system. For multi system case this is determined by the current serving radio access network.

The label **(UMTS only)** indicates this section or paragraph applies only to UMTS system. For multi system case this is determined by the current serving radio access network.

**In GSM,...** Indicates this paragraph applies only to GSM System. For multi system case this is determined by the current serving radio access network.

**In UMTS,...** Indicates this paragraph applies only to UMTS System. For multi system case this is determined by the current serving radio access network.

**GPRS:** Packet Services for GSM and UMTS system.

**MS,** Mobile Station. This specification makes no distinction between MS and UE.
