Title: **Coversheet for 23.060**

Agenda Item: **5.2.2**

<div align="center">

Release 1999 Submission form for 23.060

</div>

Work Area / Item:		3G TS 23.060					
Affects:	**UE/MS: X**	**CN: X**	**UTRAN: X**		**Compatibility Issues:**	**Yes: X**	**No:**
Expected Completion Date:		**March 2000 (TSG SA#7)**					
Services impacted:		**UMTS packet services, GPRS**					
Specifications affected:		-					
Tasks within work which are not complete (revision marks since the previous SA plenary meeting):		~~Shall anonymous access be supported for UMTS or GPRS 99? An LS has been sent to S1 to ask for guidance.~~ Subclause 6.8.4: Shall the MS be able to send its IMSI encrypted? This issue is <u>likely postponed until release 2000</u>~~still being discussed in S3~~. ~~Subclause 9.3: Shall the max N-PDU size be different from 1500 octets?~~ ~~Subclause 12.1.1: Is TCP support for UMTS on Gn and IuPS needed? S2-99D41 suggests that TCP is supported in the user plane for both Gn and IuPS.~~ ~~Subclause 15.1.3: Fair charging for UMTS to be determined.~~						
Consequences if not included in Release 1999:		-					
Accepted by TSG# **for late inclusion in Release 1999:**							

Abstract of document:

3G TS 23.060 is the signalling and network aspects stage-2 service description for GPRS in GSM and UMTS.

Contentious Issues:

No particular contentious issues expected.
