3.1 Definitions

For the purposes of the present document, the following definitions apply:

called-party pre-emption: Termination of a call to a particular user when a ~~strictly~~ higher priority call is directed towards that specific user. Called party pre-emption is decided by the ~~Mobile Station~~User Equipment without interaction of the user.

calling subscriber: Service subscriber which invokes the eMLPP service.

network operator: Entity which provides the network operating elements and resources for the execution of the enhanced Multi-Level Precedence and Pre-emption service (eMLPP).

precedence: Precedence is the priority associated with a call.

service provider: Entity which offers the eMLPP service for subscription. The network operator may be the service provider.

service subscriber: Mobile subscriber which subscribes to the eMLPP service. In principle, if a network provides eMLPP service, all users are able to subscribe to this service.
