Issues for SA Information

- ## DSR (Distributed Speech Recognition)
  - CN1 will investigate SIP and SDP impacts
  - May not make Release 5 if there are significant new requirements

- ## IMS Framework Report
  - Validation seems to be a useful concept
  - Any new requirements almost certainly can't be accommodated for Release 5.

Changes to Work Plan

- **AMR-WB WID approved**
  - CN scope only
  - Requirements needed (especially for interworking)
  - Other work outside CN needed

- **Service Change and UDI Fallback WID approved**
  - Applies to both BICC and ISUP

- **SA3 BB on UE triggered authentication should be removed**
  - Removal agreed at previous SA meetings.

Changes to Work Plan (cont.)

- **Shared Interworking Function (SIWF) Removed**

  - Agreed to remove SIWF from Release 99 onward.

  - No requirements
  - Dormant activity

  - Unclear what CN1 or CN4 would need to do

Release Issues

- **Most Wis planned for completion in March 2002.**

- **Still many dependencies on IETF, SA2, SA3**

- **CN Recommendations:**
  - **Release 5 targeted for March 2002**
  - **IMS be phased**
  - **New Release 5 work be discouraged**
