1. Overall Description:

TSG SA WG2 has discussed the recent improvements in SIP in unifying the early media, manyfolks and HEFRP which has been captured in the IETF draft “draft-rosenberg-sip-unify-00.txt”. It is expected that these changes shall be included in the next update of SIPbis (and before the IETF last call process). In addition, the manyfolks draft as well as a new draft ([draft-ietf-sip-update-00.txt](#)) which addresses update of session related parameters without impacting session dialogs, will address the requirements identified in the unify draft. SA2 has agreed that 3GPP architecture shall adapt to these changes.

SA2 will update TS 23.228 accordingly.

2. Actions:

To TSG CN1, TSG CN3, TSG CN4

ACTION: TSG SA2 asks **TSG CN1, TSG CN3, TSG CN4** to examine and identify impacts of their specifications based on the changes proposed in the appropriate impacted existing drafts and possible new drafts according to the relevant issues for 3GPP as identified in the unify draft.

3. Attachments:

None.
