Title:	**3GPP TS 21.103 v1.2.0:**
	"3rd Generation mobile system Release 5 specifications"
Document for:	**information**

TS 21.103 lists the 3GPP specifications for a Release 5 system with UTRAN. This is a draft for information, and the table of specs is far from complete. It shows those specs and reports which either exist already or which the TSGs have shown a clear intention of producing. Additionally, information on the freeze date for each spec is shown (see 21.900).

Following the freeze of Rel-5 (anticipated at SA#15), the remaining specs can be identified and 21.103 can be brought under change control.
