1. Overall Description:

SA-1 has developed service requirement and feasibility study specifications for the support of speech enabled services by 3G infrastructures. These include speech-only services, multimodal and multi-device services. Support for these services is targeted for Release 6 of the 3GPP specifications.

TR 22.977 provides a feasibility study on Speech enabled Services developed by SA-1. SA-1 is also completing a stage-1 technical specification on Speech Recognition Framework for Automated Voice Services (TS 22.243). SA1 believes that these documents would potentially be suitable for sharing with organisations working in the same area. SA1 would like to be informed about OMA activities in this area.

Subject to the working relationship being clarified, 3GPP SA1 will consider this matter further in due course.

2. Actions:

OMA is requested to advise SA1 about OMA activities in the area of Speech Enabled Services

3. Date of Next TSG-SA1 Meetings:

Meeting	Date	Venue	Comment
SA1 SWG	14-18 Oct 02	Beijing	China
SA1#18	11-15 Nov 02	TBD	Korea
SA1 SWG	20-24 Jan 03	TBD	TBD
SA1#19	24-28 Feb 03	Sophia Antipolis	France
