Summary

An LS to 3GPP SA2, copied to 3GPP SA regarding the Push specification work within 3GPP.

Liaison Statement

FROM: SerG
To: 3GPP SA2
CC: 3GPP SA
Subject: Liaison Statement regarding Push specification work within 3GPP.
Date: October 31, 2002

1. Background

SerG understand that Push services have been investigated within 3GPP since December 1999. Services based on Push capabilities are of great interest to the operator community and standardisation of this functionality is strongly desired.

GSMA SerG have reviewed progress on the Push Service in 3GPP, and are pleased to see that the Stage 1 (TS 22.174) was approved at TSG SA#17 for Release 6. This Stage 1 contains a number of operator requirements that were identified within SerG as essential to this work and subsequently adopted by SA1.

SerG now look forward to seeing the completion of the necessary 3GPP Stage 2 and Stage 3 work within the Release 6 timeframe, with GSMA member companies actively contributing to this work within 3GPP.

SerG also reviewed and endorsed the proposed Work Item for Push in SA2, believe that this provides a pragmatic way forward in developing the architecture to meet the operator requirements captured within TS 22.174.

2. Action

To SA2

SerG respectfully requests SA2 and other relevant groups within 3GPP undertake the Stage 2 and Stage 3 specification work to standardise this feature within 3GPP.

3. Future Meetings

| Meeting Number | Start Date | Finish Date | Venue |
|----------------|-------------|-------------|-----------------|
| SerG#50 | 11-FEB-2003 | 13-FEB-2003 | Yokohama, Japan |
