relationType	READ-WRITE, M	Type of relation: e.g. Intersystem relation, intra-system relation .
adjacentCell	READ-WRITE, M	Pointer to GSM cell or external GSM cell. Distinguished Name of the corresponding object..
bcchFrequency	READ-ONLY, O	This attribute contains the absolute radio frequency channel number of the BCCH channel of another GSM cell or the external GSM cell, that is broadcast in System Information in the Cell. See Note for the optional condition.
ncc	READ-ONLY, O	Network Colour Code, NCC (part of BSIC; Ref 3GPP TS 44.018 [4]) for another GSM cell or the external GSM cell, that is broadcast in System Information in the Cell. See Note for the optional condition.
bcc	READ-ONLY, O	Base station colour code, BCC (part of BSIC; Ref 3GPP TS 44.018 [4]) for another GSM cell or the external GSM cell, that is broadcast in System Information in the Cell. See Note for the optional condition.
lac	READ-ONLY, O	Location Area Code, LAC (Ref 3GPP TS 24.008 [3]) for another GSM cell or the external GSM cell, that is broadcast in System Information in the Cell. See Note for the optional condition.

NOTE: This attribute shall be included if the EM does not guarantee consistency between the cell definition and what is broadcasted on system information.

The "UtranRelation" IOC contains radio network related parameters for the relation to the "UtranCell" or "ExternalUtranCell" IOC.

NOTE: In handover relation terms, the cell containing the UTRAN Relation object is the source cell for the handover. The cell referred to in the UTRAN relation object is the target cell for the handover. This defines a one-way handover relation where the direction is *from* source cell *to* target cell.
