**1. Overall Description:**

TSG SA2 sent TS 23.195 "Provision of User Equipment Specific Behaviour Information (UESBI) to network entities" for approval to TSG SA #20. Outstanding issues were dependencies on GERAN 2 and TSG RAN plenary decisions. All outstanding issues were decided, only one decision is outstanding: the question on A interface functionality.

As the issue A interface functionality for early UE handling is not yet solved the TS still contains paragraphs marked as depending on GERAN decisions. These paragraphs cause ambiguities and do not conform to drafting rules.

TSG SA2 would like to ask TSG SA to clarify on the outstanding GERAN issue that TS 23.195 can be finalised.

**2. Actions**

Clarify on the outstanding GERAN issue.

**3. Date of Next TSG SA2 meeting**

SA2#37 12-16 January, Innsbruck, Austria  
SA2#38 16-20 February, Atlanta, GA, USA
