Work Item: Scope of the Open Service Access Release 6

Contact Person:
Name: Michael Boote
Tel. Number: +44-1793-883246
E-mail Address: mboote@lucent.com

CN5 have identified work item features which are not progressing and are not expected to be completed as part of Rel-6.

CN Plenary agreed that two issues will not be worked further in Rel-6 and this decision is supported by the lack of input documents provided on:

- 15027 - Enhanced user privacy in LCS
- 15024 - Retrieval of Visited Network capabilities

As CN group have no intention to develop 15024 and 15027 it is proposed to modify the Stage 1 WI to reflect this here and a further CR is provided at S1-031150 to amend the TS.

The classification of the WI is also corrected to reflect that this is a feature and that OSA Stage 3 (CN5) is a building block.

Work Item Description

Title: Scope of the Open Service Access Release 6

1   3GPP Work Area

	Radio Access
X	Core Network
X	Services

2   Linked work items

List of linked Work Items from OSA in Release 5 still applies and WI GUP is

added.

3   Justification

The work item describes the requirements on the Open Service Access to offer sufficient opportunities for the creation of value added services by third parties.

4   Objective

The objective of this work item on OSA Release 6 is to enhance the OSA interface of previous releases.

5   Service Aspects

The OSA Release 6 API shall support the following functions:

- Support of a Generic Network Interface Function
  This enables an application to communicate with additional non-framework service capability features by using transparent communication means.

- Support for MMS Relay/Server to VASP Connectivity.   This enables secure and trusted interaction of a MMS-VASP with the MMS Relay/Server.

- Support of user data management function enabling applications to access the Users' Profile.   The content of the User Profile may be provided using the Generic User Profile mechanisms.

- Support of OSA interfaces at different levels of abstractions

- Support of network functions for user/application authentication

- Support of access to Service capability features in other networks

- Support of IP Session Function with the following features: release flows in an IP session, control the IP session, monitor the IP session, and request of flow information.

- ~~Extensions to User Location Function (support of LCS enhanced user privacy)~~

- Extensions to Policy Management function (support of complex parameters and Policy Rule evaluation by third party applications)

- Extension to the notification of a new service's registration (addition of the level of backward compatibility)

6   MMI-Aspects

None identified

7 Charging Aspects

None identified

8 Security Aspects

The OSA API shall provide security facilities to guarantee secure access to user confidential information. Sensitive information has to be prevented from unauthorised access.

9 Impacts

Affects:	USIM	ME	AN	CN	Others
Yes				X	
No			X		
Don't know	X	X			X

10 Expected Output and Time scale (to be updated at each plenary)

The results of this Work Item shall be provided in a Technical Standard (stage 1, and 3). There is no specific OSA stage 2 as architectural and functional OSA aspects are cared for in stage 2 for VHE (TS 23.127). The work shall be aligned as far as possible with other bodies, such as ETSI SPAN and Parlay.

New specifications

TS 22.127		Stage 1 Service Requirement for the Open Service Access		
TS 23.127		Open Service Architecture;		
TS 29.198		Open Service Architecture;API Part 1		
TR 29.998		Open Service Architecture;API Part 2		

11 Work item raporteurs

Dr. Jörg Swetina, Siemens AG

12 Work item leadership

TSG S1

13 Supporting Companies

Siemens, Fujitsu Laboratories of Europe, Lucent, T-Mobile.

14 Classification of the WI (if known)

X	Feature (go to 14a)
	Building Block (go to 14b)
	Work Task (go to 14c)

14a   The WI is a Feature: List of building blocks under this feature

OSA Stage 3

14b   The WI is a Building Block: parent Feature

(one Work Item identified as a feature)

14c   The WI is a Work Task: parent Building Block

(one Work Item identified as a building block)
