| | Rel-6 (Release 6) | | | | | | | | | | | | | | | | |

| | |
|--------------------------------------|--|
| Reason for change: | ⌘ Addition of definition of WLAN UE |
| Summary of change: | ⌘ Provides abbreviation and definition for use of all WGs in connection with WLAN |
| Consequences if not approved: | ⌘ The several groups working on the addition of WLAN UE would each be using their own definitions and abbreviations. Especially in the case of the several classes of WLAN UE, the lack of uniformity definitions across working groups could lead to problems which could delay implementation. This CR will avoid such problems. |

How to create CRs using this form:

Comprehensive information and tips about how to create CRs can be found at <http://www.3gpp.org/specs/CR.htm>. Below is a brief summary:

- 1) Fill out the above form. The symbols above marked ⌘ contain pop-up help information about the field that they are closest to.

- 2) Obtain the latest version for the release of the specification to which the change is proposed. Use the MS Word "revision marks" feature (also known as "track changes") when making the changes. All 3GPP specifications can be downloaded from the 3GPP server under <ftp://ftp.3gpp.org/specs/> For the latest version, look for the directory name with the latest date e.g. 2001-03 contains the specifications resulting from the March 2001 TSG meetings.
- 3) With "track changes" disabled, paste the entire CR form (use CTRL-A to select it) into the specification just in front of the clause containing the first piece of changed text. Delete those parts of the specification which are not relevant to the change request.

3 Terms and definitions

W

WTDD: Wide TDD – the 3.84 Mcps chip rate UTRA-TDD option.

WLAN UE: WLAN User Equipment: – a UE (equipped with UICC card including (U)SIM) utilized by a subscriber capable of accessing a WLAN network. A WLAN UE may include entities whose configuration, operation and software environment are not under the exclusive control of the 3GPP system operator, such as a laptop computer or PDA with a WLAN card, UICC card reader and suitable software applications.
