Reason for change:	⌘	Addition of definition of WLAN UE
Summary of change:	⌘	Provides abbreviation and definition for use of all WGs in connection with WLAN
Consequences if not approved:	⌘	The several groups working on the addition of WLAN UE would each be using their own definitions and abbreviations. Especially in the case of the several classes of WLAN UE, the lack of uniformity definitions across working groups could lead to problems which could delay implementation. This CR will avoid such problems.
