

TSG-SA Working Group 1 (Services) meeting #2
Edinburgh, Scotland 9th-12th March 1999

TSGS1#2(99)131

Agenda Item: 7.3.5
Source: Coordinator
Title: Work Item - UMTS Services and Service Capabilities
Document for: Information & Discussion

Title

UMTS Services and Service Capabilities

Intended Output

Technical Specification

Impact on Other Technical Specifications and Technical Reports

ETSI TS 22-05 (UMTS Services and Service Capabilities) will be used as the basis for this specification. Any relevant material in ETSI TR 22-25 (UMTS Quality of service and network performance) will be transferred into 22-05 and the TR will not be progressed in 3GPP. Any other agreed requirements defined by the other partners or individual members will be captured in this specification.

Technical Scope

Pre-UMTS systems have largely standardised the complete sets of bearer services, teleservices and supplementary services which they provide. One major difference between UMTS and pre-UMTS systems is that service capabilities rather than services are standardised for UMTS, allowing service differentiation and system continuity. This Technical Specification (TS) describes how and what kind of services the UMTS user has access to

Impact on Other 3GPP Work Items

This specification will define the services and service requirements which the architecture, networks, terminals etc will have to support.
