Agenda item: 10.1  
Document for: Discussion

# Proposals for a common set of "key values"

Based on the KVs proposed by companies at SA1#105, we propose following.

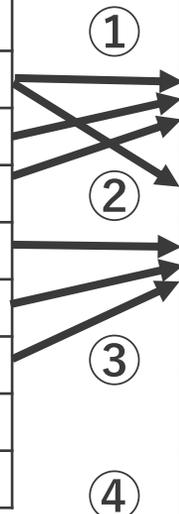

- ① Merge **Security topics** in single KV.
- ② Isolate **resilience topic** from security.
- ③ Merge **Ubiquitous connectivity topics** in single KV.
- ④ Add **Market expansion** as a new KV.
- ⑤ Consider **“aging and population declining”** topics in Sustainability KV.

KVs proposed by companies

No.	KV
1-1	Sustainability
1-2	Sustainability - Environmental
1-3	Sustainability – Social
1-4	Sustainability – Economic
2	Enhanced security and resilience
3	Trustworthiness, Trust
4	Privacy and confidentiality
5	Digital inclusion
6	Inclusivity
7	Ubiquitous connectivity
8	Ubiquitous computing
9	Ubiquitous intelligence

DOCOMO's proposals

No.	KV	
1-1	Sustainability	<b>Environmental</b>
1-2		<b>Social</b>
1-3		<b>Economic</b>
2	<b>Enhanced security and Privacy</b>	
3	<b>Enhanced resilience</b>	
4	<b>Ubiquitous connectivity</b>	
5	<b>Ubiquitous computing</b>	
6	<b>Ubiquitous intelligence</b>	
7	<b>(New) Market expansion</b>	

## How to implement "key values" in SA1 Rel20 Part2

- KVs should be described in each use case of TR, neither in SID/WID nor in TS.
  - TR or SID/WID?
    - Better to understand KVs of each use case than in SID/WID for external organizations
    - Should not take time for a consensus of SID/WID
  - TR or TS?
    - Enough to do it in TR, no need for KVs in TS
  - Notes
    - No need for KVs in the conclusion of TR
    - Try to spend time discussing the necessity of use cases and requirements rather than debating the certainty of KVs

Thank you
