---

At their meeting in Phoenix 21- 24<sup>th</sup> May, TSG SA WG3 considered the above liaison statement from SA5 on the new work item for User Equipment Management and the possible involvement of TSG SA WG3.

TSG SA WG3 recommends that this be initially addressed via the joint work item with MExE on "MExE Security Analysis".

TSG SA WG3 has suggested some changes to the current MExE Security Analysis Work Item Description, to include this, and would appreciate if these changes could be agreed, so that the revised work item can be submitted to the SA plenary.
