

3 - 6 July, 2001

Newbury, UK

Work Item Description**Title 3GPP Handover Interface for Lawful Interception**

This work item description addresses the work to specify the HI2 (Intercepted Related Information) and the HI3 (Content) interfaces for Packet Data delivery to the Law Enforcement Monitoring Facilities for 3G networks. Only the 3G Packet Domain (and for later releases Multi Media Domain) is addressed in this specification. The Circuit-Switched Domain is already addressed by different regional specifications. HI1 (Administration) is not covered in this specification and is considered to be a matter of national regulation.

1 3GPP Work Area

	Radio Access
X	Core Network
	Services

2 Linked work items*3GPP 33.106**3GPP 33.107***3 Justification**

Laws of individual nations and regional institutions (e.g. European Union), and sometimes licensing and operating conditions define a need to intercept telecommunications traffic and related information in modern telecommunications systems.

4 Objective

14

Classification of the WI (if known)

	Feature (go to 14a)
	Building Block (go to 14b)
	Work Task (go to 14c)

14a The WI is a Feature: List of building blocks under this feature

(list of Work Items identified as building blocks)

14b The WI is a Building Block: parent Feature

(one Work Item identified as a feature)

14c The WI is a Work Task: parent Building Block

(one Work Item identified as a building block)
