1. Overall Description:

SA5 thanks SA1 for its LS S1-011301 on Presence Service and the attachments. TS22.141 provides a good starting point for SA5 to begin its charging work. SA5 notes the information provided by attached Change Requests. Further review will be provided and, as necessary, questions for clarification may be forthcoming.

SA5 notes that an architectural model from SA2 is needed in order to determine what network elements would be involved in the collection of charging information. Further, SA5 would like to be advised of the timeframe in which architectural information will be made available.

SA5 notes that only off-line charging functionality will be available for Release 5. On-line charging is scheduled for Release 6 and currently limited to IMS.

2. Actions:

To SA2 group

ACTION: SA5 requests that architecture be furnished to support TS22.141, Presence Service; Stage 1 (Release 5). In particular, what network elements are involved to provide "support for multi-domain access and support of generic entities" so that charging information may be provided? SA5 would also like to know the approximate timeframe in which to expect the requested information.

To SA1 group

ACTION: SA5 requests that SA1 assist, as necessary, with provision of any other requirements that will enable SA2 and SA5 to complete their work in support of Presence Service.

3. Date of Next SA5 Meetings:

Meeting	Date	Location	Host
SA5#25	14-18 Jan 2002	Sophia Antipolis, France	ETSI
SA5#26	25 Feb - 1 Mar 2002 (T1M1/TMF)	Miami, FL / USA	NA Friends
